Re: Consultation on Seasonal Multiplier Factors for Gas Transmission

Dear Jillian,

GNI (UK) welcomes the opportunity to provide feedback on the Utility Regulator's (UR) 'Consultation on Seasonal Multiplier Factors for Gas Transmission'. (30th March 2022)

We note that this consultation relates to the proposed seasonal multiplier factors to be applied to non-annual entry capacity bookings in the postalised tariff from **1 October 2022**, and, the proposal to maintain the current factors into Gas Year 22/23.

We also affirm our understanding that this consultation paper meets requirements within the EU Regulation on establishing a network code on harmonised transmission tariff structures for gas, known as TAR NC, which has been amended to facilitate the UK's exit from the EU.

Given that there is no change to the current factors, and that they remain aligned with the CRU/ROI multipliers, GNI (UK) agrees with the approach outlined in this consultation. Noting also that clear indication was provided last year of the proposals to maintain current factors into Gas Year 22/23 [factors which continue to meet the requirements of the TAR NC] GNI (UK) is pleased to support this proposal.

I trust this is in order, however, should you have any queries in this regard please don't hesitate to contact me.

Yours sincerely,

A handwritten signature in blue ink, reading "Aine Spillane".
