My name is [REDACTED]. I am a youth and community worker based in [REDACTED] a rural community in Derrys rural hinterlands (the first community in Derry connected to Firmus Gas).

Over this past year it has been price hike after price hike. With gas up over 300%. Our people and communities cannot take no more. Too many are struggling and really are choosing heating or eating. Too many young people are worried as they see their parents struggle to meet ends meet. This can't go on.

Cut Firmus Gas profits margin to zero. Noone should be profiting during a cost of living harship emergency, and yet they continue to exans their network here in the north west.

People can't take this anymore. Health, well being and lives are at risk.

Regulator gone do us all a favour and for once stand up for the people. Do the right thing. Defend the people from any further misery.

This isn't normal life in 2022!

Regards

Dear Mr Squires,

I find it morally sickening that such energy companies as Firmus Gas and others can be reporting such huge profits during such a desperate time. The cost of living crisis is only such because such entities continue to make these huge profits. People all around me are desperate: they are literally sick with worry, they are going without food and heating, let alone any of life's treats! It is summer right now; winter frankly doesn't bear thinking about for most of us.

I would like it noted my strong belief that during such a time of crisis their profit margins should be ZERO. Such a crisis is no time for profiteering.

Thankyou,

Yours

Cut their profit margin to 0.

No one should be profiting during a crisis.

Thank you
