Our Ref: NET/E/JF/1126

Dear Claire,

Application for consent to a longer period for the issuance of a Connection Offer at 49 Aghaderg Road Banbridge, NIE Networks Reference: 24/10942

Thank you for your letter received 24 January 2025 (the **Letter**) setting out an application (the **Application**) made by NIE Networks Limited (**NIE Networks**) for an extension to the period within which NIE Networks is required to make a connection offer (the **relevant Connection Offer**), concerning a [REDACTED] Wind Generator at **49 Aghaderg Road Banbridge**.

In this letter we shall refer to the person making the application for the relevant Connection Offer as the **Connection Applicant**.

1. The Application

The Letter describes the relevant background¹ to the Application. Reference is made to Condition 30 of NIE Networks' licence authorising participation in the activity of distribution (the **Licence**).²

¹ What follows is a summary of the Application. It is not intended to be a complete rehearsal. All parts of the Application have been considered in making the decision set out in this correspondence. Failure to mention parts of the Application (or related correspondence) should not be taken as representing any failure to have regard to those parts.

² [NIE Distribution Licence](#).

Condition 30 (6) (of the Licence) provides that (barring specified exceptions)³ NIE Networks is obliged to make an offer for connection to the distribution system *as soon as practicable* and (by operation of Condition 30 (6)(b)) *in any event within 3 months*

“after receipt by [NIE Networks] of an application containing all such information in relation to the required connection as [NIE Networks] may reasonably request.”

Condition 30 (6) is to be read alongside and reflects the provision made in Article 20(3) through to Article 20(5) of the Electricity (NI) Order 1992 (the **Electricity Order**).

Condition 30 (7) of the Licence allows NIE Networks to make an application to the Authority⁴ (following requisite consultation) for a consent (in writing) that the period specified in Condition 30 (6)(b) shall be substituted by a longer period and subject to any conditions as specified in the consent.

Significantly, the making – or grant - of a Condition 30(7) type application does not alter NIE Networks’ licence obligation⁵ (under Condition 30(6)(a)) to make a connection offer *as soon as practicable*. The primary obligation (recorded in Condition 30(6)(a) of the Licence and Article 20 the Electricity Order) - to make a connection offer *as soon as practicable* - remains.

The Letter states:

“[the application for the relevant Connection Offer from the Connection Applicant] was deemed compliant on 18 November 2024. The license standard at this time for provision of this Connection Offer was 18 February 2025.”

The Application (made in the Letter) is for consent – under Condition 30(7) - for a longer substituted Condition 30 (6)(b) period out (from **18 February 2025**) to **20 June 2025**.

The Application refers to NIE Networks receiving a large number of applications in the past year - *“Export applications coupled with a surge in zero applications has made the demand to reach the 3-month licence standard much greater.”*

³ Recorded in Article 21 of the Electricity (NI) Order 1992 (the **Electricity Order**): see Condition 30(6) (d) of the Licence.

⁴ In this correspondence we use the words “us” “we” “our” “UR” “Utility Regulator” and “Authority” interchangeably to refer to the Northern Ireland Authority for Utility Regulation.

⁵ Which aligns with the statutory duties reflected in Articles 19 and 20 of the Electricity Order.

NIE Networks states that *“this work has taken considerably more resource and time to complete than it would take during normal application levels”* and cites this as a reason for requesting more time to facilitate related liaison with SONI and (if capacity is available) to carry out detailed design and costing work to produce a relevant Connection Offer.

NIE Networks states that *“These large volumes have had a knock-on effect to the Generation Queue and the number of applications NIE Networks can process in a week.”*

The Application further records that:

“Over the past month our team has grown [sic] in size, which will help manage the workload. We are already seeing the benefits of these changes which is improving work load management and an important step in getting back to our 3-month licence standard for export and zero-export applications.”

The Application also states that NIE Networks will issue the relevant Connection Offer before 16 June 2025 should it be in a position to do so but acknowledges that a further C30(7) type application might be required *“if other complex issues arise during NIE Networks’ or SONI’s analysis.”*

Reflecting the points above, NIE Networks explains the rationale for seeking the consent sought in the Application as follows:

“Given the influx of applications it will allow

- 1. SONI to determine if transmission capacity is available considering of the interactivity of other applicants in the queue ahead of them*
- 2. NIE Networks time to accurately design and cost connections taking account of the impact of others in the queue ahead of them.”*

NIE Networks also states that granting the consent sought would enable *“SONI and NIE Networks to determine if capacity is available, complete connection design and production of a connection offer subject to capacity becoming available,”* while not granting the extension *“would result in NIE Networks not being able to meet its licence standard.”*

2. Consultation associated with the Application

Condition 30(7)(a) of the Licence provides that NIE Networks must consult with the Connection Applicant when making an Application (for extension) under Condition 30(7).

The Application sets out such consultation with the Connection Applicant – the Connection Applicant has not provided a response.

So far as affected parties' consultation is concerned, the Application says this:

“Affected Parties Consultation

In line with the process outlined in NIE Networks' 'Distribution Generation Application and Offer Process Statement' NIE Networks are engaging with SONI in determining if there is Transmission Capacity available for this applicant.

As highlighted earlier NIE Networks still need to determine alongside SONI how each applicant affects others in the queue ahead. NIE Networks therefore have not been able to consult with individual applicants about the impacts of those ahead of them in the queue as it may not be a true reflection. For that reason, NIE Networks does not consider it appropriate to engage with any further parties in consultation at this stage of the process. When NIE Networks becomes aware of which applicants affect others we will assess if individual extensions have had a determinantal impact on them and whether we need to consult with them at that stage.”

3. The Authority's decision

In making our decision on the Application we have regard to:

- (a) our published decision document on extension applications⁶
- (b) our principal objective (and related statutory objectives) under Article 12 of the Energy (NI) Order 2003
- (c) the contents of the Application
- (d) the consultation with the Connection Applicant

Having considered the matter fully, the Authority hereby confirms that it provides the consent sought in the Application. It follows that the period under Condition 30(6)(b) of the Licence (in

⁶ [Electricity Connections Review Decision Paper | Utility Regulator \(uregni.gov.uk\)](http://www.uregni.gov.uk/Electricity%20Connections%20Review%20Decision%20Paper)

respect of the application for connection made by the Connection Applicant for the [REDACTED] Wind at **49 Aghaderg Road Banbridge**) is now extended until **20 June 2025**. We consider the Application justified for the reasons set out in the Letter.

The Authority notes that similar reasoning is used to other applications⁷ over the past 11 months, centring on the volume of connection applications, but with some differences. A large number of export applications, and a surge in zero export applications is referenced. We note NIE Networks has considered and updated the rationale for seeking extension, while noting concern that the number of applications is still causing challenges for NIE Networks to meet the 3 month Condition 30 timeline, in some cases.

We recognise that NIE Networks has stated in the Application that it has expanded the team responsible for connection requests, and stated it is already seeing the benefits of these changes. They are *“improving work load management and [are] an important step in getting back to our 3-month licence standard for export and zero-export applications.”* This is a welcome step towards the expressed aim that this will allow a return to the pre-November 2023 level of connection applications turnaround, which would be a positive development, and the Authority will continue communication with NIE Networks to monitor if this is happening.

We welcome the commitment of NIE Networks to work with SONI in progressing the relevant connection applications to include that of the Connection Applicant.

We would take this opportunity to confirm that the (extended consented to) period ending 20 June 2025 is a “long stop” date. The obligation under Condition 30 of the Licence is (now), subject to applicable exceptions,⁸ to make a relevant Connection Offer to the Connection Applicant for the [REDACTED] Wind Generator at **49 Aghaderg Road Banbridge** “as soon as practicable” and “in any event no later than” 20 June 2025. The Licence obligation is not (now) simply to offer connection terms by 20 June 2025.

This decision will be published and placed on the Register in the normal way.

Please do return to us should you require any clarification.

⁷ [2024.10.08 NIE C30 Holywood Road Redacted_0.pdf \(uregni.gov.uk\)](#).

⁸ Consonant with NIE Networks’ licence obligations and its statutory duties set out in Articles 12 and 19 of the Electricity Order.

Yours sincerely,

Jillian Ferris

Head of Networks
Duly authorised by the Authority
