1. Message from John French, CEO

Dear Applicant,

Thank you for taking the time to read this Guide for Applicants.

This is an exciting time to join us. We are expanding as an organisation to fully support Northern Ireland in meeting the challenges of climate change, the continued cost-of-living crisis and ensuring the continuity of energy and water supplies.

Electricity, gas and water are essential services that support all homes and businesses in Northern Ireland. As an economic regulator, it is our role to enable, incentivise and hold energy and water companies to account for providing the very best levels of service and price for consumers both now and in the future.

We want the Utility Regulator to be the best possible organisation to work for. We need passionate people who have the skills, potential and motivation to make a difference to the lives of people in Northern Ireland and its economy.

We are looking for people who share these goals and will pursue these with the highest standards of professionalism. We will recruit the best candidates from a range of diverse backgrounds. If you strive to provide the highest levels of service for the greater good and your professional values accord with our organisational values, working here will be exactly what you are looking for.

We are an employer of choice and are committed to staff wellbeing, inclusion and excellence. Recently, we were awarded Best Companies 'Very Good to Work For' status. We have also been successful in gaining the Investors in People Silver Award, the Diversity Mark and Disability Confident: Committed accreditations.

Working as Regulatory Analyst within our Price Controls Directorate, you will provide analysis and advice on electricity, gas and water issues, as they relate to Northern Ireland consumers, and to the companies we regulate. You will also support the organisation as we support government initiatives as part of the climate change transition.

This is a permanent, full-time role, although flexible working will be considered.

Thank you for your interest in joining the Utility Regulator. We very much look forward to receiving your application.

A handwritten signature in black ink, appearing to read 'J. French'.

John French, Chief Executive

2. About the Utility Regulator

The Utility Regulator is the independent non-ministerial government department responsible for regulating Northern Ireland's electricity, gas, water and sewerage industries, to promote the short and long-term interests of consumers.

We are not a policy-making department of government, but we make sure that the energy and water utility industries in Northern Ireland are regulated and developed within ministerial policy as set out in our statutory duties.

We are governed by a Board of Directors and are accountable to the Northern Ireland Assembly through financial and annual reporting obligations.

We are based at Millennium House, Great Victoria Street, in the centre of Belfast. The Chief Executive and two Executive Directors lead teams in each of the main functional areas in the organisation: CEO Office; Price Controls, Networks and Energy Futures; and Markets, Consumer Protection and Enforcement. The staff team includes economists, engineers, accountants, utility specialists, legal advisors and administration professionals.

A dark blue rectangular infographic with a green L-shaped graphic element in the top right corner. It contains text about the Utility Regulator's mission, vision, and values.

OUR MISSION
To protect the short and long-term interests of consumers of electricity, gas and water.

OUR VISION
To ensure value and sustainability in energy and water.

OUR VALUES

ACCOUNTABLE:
We take ownership of our actions.

TRANSPARENT:
Ensuring trust through openness and honesty.

COLLABORATIVE:
Connecting and working with others for a shared purpose.

DILIGENT:
Working with care and rigour.

RESPECTFUL:
Treating everyone with dignity and fairness.

Our diversity statement

Be UR Self

We recognise and value that everyone is unique and that we all have different minds. We want to celebrate your difference so that we can harness your unique talent. To that end, we are a diverse and inclusive organisation as we put the 'you are' into 'UR'. Our success is based on the diversity and uniqueness that each of us brings and on the willingness of staff to accept and value one another. This approach helps us protect consumers by making a positive difference to all households and businesses in Northern Ireland.

Equality welcoming statement

Northern Ireland continues to have an under-representation of women across STEM (Science, Technology, Engineering and Mathematics) industries, we are proud to support women in STEM. We are an equal opportunity and 'Disability Confident' employer. As people with a disability and people from ethnic minority communities are currently under-represented in our workforce, we would welcome applications from these groups.

What we do

Our statutory objectives are to:

- Protect the short and long-term interests of electricity, gas, water and sewerage consumers with regard to price and quality of service;
- Promote a robust and efficient water and sewerage industry, where appropriate, to deliver high quality services;
- Promote competition, where appropriate, in the generation, transmission and supply of electricity; and
- Promote the development and maintenance of an economic and coordinated natural gas industry.

Our work involves:

- Issuing and maintaining licences for gas, electricity, and water companies to operate in Northern Ireland;
- Making sure that these companies meet relevant legislation and licence obligations;
- Challenging these companies to keep the prices they charge as low as they can be;

- Encouraging regulated companies to be more efficient and responsive to customers;
- Working to encourage competition in the gas, electricity, water, and sewerage services markets;
- Setting the standards of service which regulated companies provide to customers in Northern Ireland; and
- Acting as an adjudicator on certain customer complaints, disputes, and appeals.

We hold concurrent competition law powers and are Northern Ireland's competition authority for its electricity, gas, water and sewerage industries. We have quasi-judicial powers to determine certain complaints, disputes and appeals.

In order to help us protect the interests of electricity, gas and water consumers in Northern Ireland, we work with a range of partner organisations. These include:

- Northern Ireland Executive and Assembly;
- Northern Ireland government departments;
- Energy and water utility companies;
- The Consumer Council for Northern Ireland;
- Government departments and bodies in Great Britain and Ireland, including Ofgem, Ofwat, the Water Industry Commission for Scotland and the Commission for Regulation of Utilities; and
- Non-governmental organisations.

3. About the role

Role: Regulatory Analyst - Price Controls

Directorate: Price Control

Line manager: Regulatory Manager

Key dates for applicants:

Closing date: 12:00pm, Friday 1 August 2025

Assessments and interviews are expected to take place end of August.

Terms and conditions

Contract	Permanent. Flexible working arrangements will be considered.
Hours	37 hours per week.
Salary	£45,478 to £56,846 per annum.
Pension	Northern Ireland Civil Service (NICS) pension arrangements.
Holidays	25 days per annum (rising to 30 days after two years), and an additional 12 public and privilege days.

We may create a reserve list from this competition to fill any additional suitable similar roles.

Role purpose

Working in the Utility Regulator's Price Control Team you will be responsible for undertaking detailed analysis and recommending action which will determine the outputs, expenditure, finances and customer service of electricity, gas and water network companies, and regulated electricity and gas suppliers.

To place this work in context, our most recent price control for NIE Networks determined a total expenditure of £2.25bn over a six year period that will deliver major industry change to support the delivery of net-zero. The company is expected to invest £1.5bn by 2031, by which time it will have a regulated asset base (asset value) of £4.0bn.

This role is ideally suited for someone with a background in numerical and statistical data analysis and/or modelling, economic regulation, engineering, finance or economics. You should also have the ability to build and maintain positive and trust-based working relationships, both internally and externally; have a proactive, collaborative and flexible attitude, and be unfazed by operating in a fast-changing environment.

For the purposes of recruitment, Analysts in the Utility Regulator's Price Control Team fall into one of four broad technical areas: asset management, economic, financial and regulatory policy.

Asset Management Analysts will be capable of applying a range of engineering and asset management skills including knowledge of: technical issues in a relevant sector; demand estimation; asset management excellence techniques; whole life cost analysis; business case analysis; costing systems; capital and operational cost challenge; procurement practice; risk management; asset performance/service linkage; and emergency response.

Economic Analysts will be capable of applying a range of economic analytical skills to regulated companies including knowledge of: general economic principles; econometrics; efficiency benchmarking; practical cost challenge; whole life cost analysis; real price effects; productivity; financial modelling; revenue modelling; corporate financing; design and implementation of incentives; service delivery; distributional effects and cost reflectivity; non-financial benefits and externalities; business case assessment; risk assessment; and development of economic policy framework.

Financial Analysts will be capable of applying a range of financial analytical skills to regulated companies including, but not limited to, knowledge of: corporate and/or regulatory finance; statutory and regulatory accounts; audit practice; cash-flow analysis; depreciation; tax calculation; rate of return; finance ability metrics; business case assessment; revenue modelling; financial modelling; tariff structures; and tariff calculations.

Regulatory Policy Analysts will be capable of developing and applying a range of regulatory policy knowledge, supported by strong analytical abilities, including: identification of strategic outcomes; knowledge and experience of developing and implementing new evidence based policies in conjunction with a range of stakeholders; interrogation of data; qualitative and quantitative comparative analysis; financial awareness; stakeholder and consumer engagement; business case assessment; and delivery focus.

Key responsibilities

While applying core skills, Analysts are also expected to undertake a range of cross-discipline work, developing new skills and bringing new insights, as they work across a range of regulatory issues. In doing so, all Analysts undertake and contribute to the:

- Development of regulatory policy and the production of high quality external documentation such as information requirements, determinations, performance monitoring reports, licence modifications and resolution of complaints and appeals;

- Constructive engagement with consumers, consumer representatives, regulated companies, government departments, the wider community of stakeholders; and
- Production of internal reporting and management documentation including Utility Regulator Board papers, risk registers, forward work programmes, legal advice requests and project management processes.

You will also have strong analytical skills, excellent communication skills, the willingness to take responsibility and the ability to build and maintain open positive stakeholder relationships. Analysts must be able to translate complex issues by drafting, structuring and explaining written material simply and persuasively for a variety of audiences. You will also be able to manage a competing workload to tight timescales. Alongside these skills and background, previous experience within a regulated sector, particularly in a regulatory price control environment would be an advantage.

In this process we wish to recruit staff who will fill financial and economic analyst roles. However, we will consider applicants from an asset management or regulatory policy background with demonstrable skills in economic regulation and cross over skills and experience in financial issues.

Your main responsibilities are set out below.

- To support the Chief Executive, Board and Senior Leadership Team of the Utility Regulator.
- To support the Utility Regulator in the delivery of our annual Forward Work Programme and Corporate Strategy, and provide a value for money service, underpinned by good governance and project management.
- To monitor, report and present on policy area, project status and issues to management and Board.
- Identify, understand and help the Utility Regulator tailor relevant regulatory price control best practice from a range of other jurisdictions.
- Review and scrutinise a range of numerical and written information from regulatory submissions: for example, business plan data submissions, annual regulatory reporting data submissions, price control re-opener data submissions and ad-hoc data submissions.
- Compilation of numerical data from a variety of sources in various formats, translation of the data into the format required, population of data templates and associated data assurance.

- Provide regulatory analysis, options and recommendations as part of our electricity, gas and water price controls, relating to a range of regulatory price control areas such as economic efficiency, finance, incentives and costs (engineering assets and other types of cost).
- Provide policy and regulatory input into the Utility Regulator's work streams.
- To ensure that a project plan, governance structure and other project management practices are in place, to ensure effective management of your activities.
- To ensure effective and positive relationships and partnership working with other directorates of the Utility Regulator.
- To analyse qualitative and quantitative data from a wide range of sources to produce timely insights and reports to inform regulatory development, and in doing so, take a structured approach to problem-solving.
- To maintain and create policies, controls, process and standards, and ensuring policy and regulatory compliance.
- To build and maintain a strong expert knowledge of your relevant policy area, investing in continuing professional development where appropriate.
- To monitor and anticipate legislative and/or societal changes and to assess the impacts of these changes on regulation and consumers.
- To review and challenge submissions made by energy and water companies.
- To provide effective solutions to address emerging policy issues or challenges in your area of responsibility.
- To develop clear and concise management papers and policy documents (such as consultations, decisions, and guidance).
- To lead projects as required, and in-line with best practice project management principles.
- To proactively look to maximise the Utility Regulator's core statutory objective to protect the interests of energy and water consumers in Northern Ireland.
- To manage and develop constructive stakeholder relationships within government and industry to influence positive change to regulation in Northern Ireland.
- To assist in strengthening the profile, reputation and relevancy of the Utility Regulator to staff, consumers, stakeholders and industry.

- To promote a culture of openness, inclusiveness and transparency across all aspects of the Utility Regulator's operational activity and service delivery.
- Positively engage in delivering the work of your directorate through team-based work and a 'right first time' approach.
- Flexibly support and address organisational priorities as they arise.
- Fulfil and actively contribute to the values of the Utility Regulator.

This list is not exhaustive and will change over time according to organisational need. The postholder will be required to carry out other duties as allocated by management.

Our statutory remit and organisational structure are continuing to evolve. It is therefore quite possible that the scope of the advertised role will evolve with consequential changes to the job description.

4. Selection criteria

This role is ideally suited for someone with a background in numerical and statistical data analysis and/or modelling, economic regulation, engineering, finance, or economics. You will also have the ability to build and maintain positive and trust-based working relationships, both internally and externally; have a proactive, collaborative and flexible attitude, and be unfazed by operating in a fast-changing environment.

Essential criteria (for all candidates)

Please note that you will be required to demonstrate fully the following essential criteria (1-7) on the application form to be shortlisted for the next stage of the process.

In completing this application relevant technical*, industry** and context** refers to:

*A relevant technical area may include numerical and statistical data analysis and/or modelling, asset management, economic regulation, engineering, finance, accountancy, economics or regulatory policy development; fin-tech; sciences; energy or other analytically based disciplines.

**A relevant industry could be related to heat, water, electricity or gas networks, other regulated utilities; or advisory professionals supporting similar industries; or engineering expertise relating to utilities.

***A relevant context could relate to the application of relevant core asset management, economic, financial skills and/or policy development skills, policy development related to regulatory price controls or another area of economic regulation or another similar area.

	Essential criteria
1	A higher level qualification (a degree, level 6 equivalent or above) in a relevant technical* area and at least three years' experience relevant to one or more of the broad technical skills outlined above, in a relevant industry**and context**. OR at least five years' experience relevant to one or more of the broad technical skills outlined above, in a relevant industry and context.

	Essential criteria
2	<p>Proven ability demonstrated by example to think critically, validate and analyse complex data both quantitative and qualitative, and challenge and sense check results, in order to provide advice and recommendations on one or more of the following:</p> <ul style="list-style-type: none"> - Business / commercial issues. - Utility / market regulation issues. - Economic / policy considerations.
3	<p>Proven ability demonstrated by example of excellent oral and written communication skills, with ability to produce high quality external published reports of their own analysis by describing and structuring complex numerical and written information simply to support the delivery of business or policy decisions.</p>
4	<p>Proven ability demonstrated by example to engage with colleagues, relevant counterparties and a range of stakeholders to build relationships, achieve common goals and / or navigate potential or actual conflict where there are different aspirations.</p>
5	<p>Proven experience demonstrated by example of project management and governance, with the ability to manage workstreams or areas, to tight deadlines and with competing priorities, by applying formal project management techniques and structures.</p>
6	<p>Proven ability demonstrated by example of applying existing skill sets and applying proactive continued personal development to develop new or cross-discipline skill sets to solve problems in new or changing situations.</p>
7	<p>Ability to positively demonstrate by example, an understanding of and commitment to further workplace values that align to those of the Utility Regulator. (Our mission, vision and values can be found on page 4 of this pack.)</p>

Desirable criteria

In the event of a large number of applicants, the following desirable criteria will be used as further shortlisting criteria. This criterion should be demonstrated on the application form and may be tested further at the interview stages.

- Demonstrable experience in economic regulation of price controls.

Key skills and competencies

In addition to satisfying the above essential criteria, applicants will be expected to display the following competencies and skills at interview and assessment stages.

Key skills and competencies	
Professional knowledge/skills	<p>Subject knowledge in the broad areas of asset management, economics, financial and / or regulatory policy development outlined above.</p> <p>A 'curious mind', with a proactive approach to learning and personal development.</p> <p>Ability to develop knowledge as 'subject expert' in work area.</p> <p>Ability to communicate expert knowledge to non-experts and develop the broader knowledge of Utility Regulator staff.</p> <p>Ability to take a high degree of individual responsibility and carefulness in approach to work.</p>
Analytical rigour	<p>Ability to carefully handle and robustly analyse complex numerical data sets and a range of different sources of written information on complex regulatory issues.</p> <p>Ability to use analysis to investigate and recommend and weigh up policy options and a way forward.</p> <p>High level of attention to detail and accuracy.</p> <p>Ability to use analysis to resolve problems.</p>
Governance	<p>Ability to apply best practice and work within policy, governance appropriate guidelines, public sector governance and legal requirements.</p>
People	<p>Strong communication and interpersonal skills.</p> <p>Positive alignment with the Utility Regulator's values.</p> <p>Excellent verbal and writing/drafting skills.</p>
Relationship management	<p>High level of negotiation and influencing skills.</p> <p>Ability to develop and build positive and trusted relationships with a wide variety of colleagues and external stakeholders.</p> <p>Ability to positively challenge colleagues and stakeholders at all levels.</p> <p>Ability to work collaboratively and deliver in partnership.</p>
Strategic thinking and delivery	<p>Ability to take personal ownership of work streams and drive forward to conclusion with minimum supervision.</p> <p>Ability to think creatively, to innovate and resolve problems.</p> <p>Ability to contribute to the delivery of projects.</p>
Managing resources	<p>Ability to demonstrate project management skills, including organisational, time management, risk management and problem-solving skills.</p> <p>Ability to balance competing demands effectively.</p> <p>Ability to work well under tight deadlines.</p>

Competency Framework

You may wish to consider the Utility Regulator's Competency Framework when completing your application. A copy can be downloaded alongside this recruitment pack.

5. The recruitment and selection process

How to apply

Completed application forms must be received by 12:00pm, Friday 1 August 2025.

Please submit your application by email, in MS Word format. A typed or scanned signature will be accepted. Please submit your completed Equal Opportunities Monitoring Form in a separate email labelled clearly 'Monitoring Form' in the subject line.

The onus is on you to ensure your application is received before the closing date. We will use the time it is received according to our computer systems, not the time sent from your email account.

Applications and queries must be emailed to recruitment@uregni.gov.uk.

If you have a disability and require assistance, we will facilitate this on request. If you wish to receive this information pack in an accessible format, please advise of your requirements as soon as possible as the closing date is the same for all applicants.

Monitoring Form

We monitor applications for employment in terms of community background, sex, disability and race. You should note that this information is regarded as part of your application and failure fully to complete and return it will result in disqualification.

The use and confidentiality of community background information is protected by the Fair Employment and Treatment (Northern Ireland) Order 1998. It will be used only for monitoring, investigations or proceedings under the requirements of the above legislation.

We are committed to equality of opportunity and welcome applications from all suitably qualified applicants irrespective of age, sexual orientation, marital status/civil partnership, dependants, religious belief, political opinion, gender reassignment, race, sex or disability.

Job applicant's privacy notice

We are the data controller for the personal information you provide as an individual seeking employment. This means we determine the purposes for which, and the manner in which, any personal information relating to your application and the recruitment procedure generally is processed. We are required under the General Data Protection Regulation (GDPR) to notify you of the information contained in our Job Applicant's Privacy Notice. This notice

describes how we collect and use personal information during the recruitment process and afterwards in accordance with GDPR and can be downloaded, in full, from www.uregni.gov.uk/publications/gdpr-privacy-notices.

Applications

In order to help you make this application and ensure that each applicant is provided with the same opportunity, the following advice is offered:

- Do not use acronyms, complex technical detail, etc. Write for the reader who will probably not know your employer or your job. Include concise examples and be sure you can expand on these at interview.
- Listing the titles of the various jobs which you have held will not show how you meet the criteria. The panel will not make assumptions about skills and experience gained from these or the nature/name of the organisation.
- Write down clearly your personal involvement in any experience you quote. Write 'I' statements, for example, I planned meetings, I managed a budget, I prepared a presentation. It is how you actually carried out the piece of work that the panel will be interested in.
- Identify relevant examples – this is very important as examples you provide may be checked out at interview and you need to be prepared to talk about them in detail if invited to interview. It is your unique role the panel is interested in, not your team's.

An application form is designed to ensure you provide the necessary information to determine how you meet the eligibility/short listing criteria required for this post. The panel may decide to interview only those applicants who appear, from the information provided on your application, to be most suitable in terms of relevant experience and ability.

Please note to ensure equality of opportunity for all applicants:

- On the application form you have been advised of the maximum space available for each question. This is the same for all applicants and must not be altered (except to delete spaces created when you type in your answer);
- CVs, letters, additional pages or any other supplementary material in place of, or in addition to, completed application forms will not be accepted;
- Information in support of your application will not be accepted after the closing deadline. Incomplete application forms will not be considered. Application forms received after the closing deadline or reformatted will not be accepted;

- Please note that the time of receipt of emailed applications will be defined by our computer systems, not the time and date sent; and
- Only details provided by you on your application form (employment history and eligibility criteria) will be provided to the selection panel for the purpose of determining eligibility and shortlisting for the post.

Assessing your application

After the closing date, the first stage in the selection process will be a sift of completed application forms against the essential criteria. You must demonstrate on the relevant page of the application form how you meet each criteria stated. If you do not fully demonstrate by example how you meet each of the criteria, you will not progress to the next stage. Please note, where the criteria requires experience for a minimum length of time, the panel will not refer to the employment history section to demonstrate this. You must state the dates in your answer.

You will be notified of the outcome (successful/unsuccessful) by email.

Assessment and interview

Following shortlisting, it is intended that the selection process will involve an assessment and interview against the criteria, key skills and competencies for the role. Panels may test any aspect of either the essential, desirable criteria or key skills.

Additional selection stages may be needed. We intend that the interview process will take place in Millennium House, Great Victoria Street, Belfast. You will be informed of assessment and interview arrangements closer to the time and notified of the outcome (successful or unsuccessful) by email.

Disability requirements at interview

We ask on this application form if you require any reasonable adjustments (special requirements), due to disability, to enable you to attend interview. Details of any disability are only used for this purpose and do not form any part of the selection process.

If you have indicated that you have a disability and are successful in the selection process and being considered for appointment, you may be required to outline any adjustments you consider needed to take up an appointment. If you wish to discuss your disability requirements further, please email recruitment@uregni.gov.uk.

Further information

Further information about the work of the Utility Regulator can be found at www.uregni.gov.uk.

Should you have any further queries about the recruitment and selection process then please email recruitment@uregni.gov.uk.

Checklist for applicants

- Application Form (emailed by closing date).
- Equality Monitoring Form (emailed in a separate email).

6. Benefits of working for us

These headline terms will be included (amongst others) in a written contract of employment.

Key employee benefits

These headline terms will be included (amongst others) in a written contract of employment.

Your salary

The starting base salary will be in the range of £45,478 to £56,846 annum. If you are successful, you will normally be offered the first point on the scale. You will be paid monthly in arrears via Bankers Automated Clearing Service (BACS).

Your pension

If you are successful, you will be employed as a civil servant and, as such, automatically enrolled into the NICS pension arrangements. Employer's contribution for this salary range is 34.25%. This is a generous, defined benefit pension scheme. Information about pensions can be found at www.finance-ni.gov.uk/topics/working-northern-ireland-civil-service/civil-service-pensions-ni

Your holiday entitlement

Holiday entitlement will be pro-rated based on 25 days per annum (increasing to 30 days after two years continuous service) and 12 public and privilege holidays. If, in your current role, you have already attained 30 days leave by dint of service with the Northern Ireland or Great Britain Civil Service, your entitlement will be 30 days from your start date (pro-rated).

Non-salary benefits

We offer a range of non-salary benefits including a supportive family friendly environment, flexible working in a hybrid setting, generous leave including special leave, maternity/paternity entitlement, wellbeing and employee programme (Inspire), supported learning and development, Cycle to Work Scheme, season ticket loan, payroll giving, volunteering opportunities and a culture that supports diversity and inclusion.

Hours of work

This is a full-time appointment, however, flexible working arrangements will be considered. Our offices are open for business between 7am and 7pm (Monday to Friday). You may avail of 'flexitime', provided it meets business needs, with flexible start and finish times outside core hours of 10am to 4pm. Due to the nature of

your position, you may be required to work such additional hours, over and above your standard hours, (37 hours excluding meal breaks) as necessary for the proper fulfilment of your duties for which no additional payment will be made.

Place of work

If appointed, you will be our employee and based at Millennium House, Great Victoria Street Belfast. We operate a hybrid working pattern, which is an average of 40% of all staff working hours to be in person with colleagues, either on-site at Millennium House or on official business. This hybrid working pattern is subject to business need. The home working element of hybrid working is voluntary and while you may opt to be office based, we welcome applicants whose circumstances lend themselves to a degree of remote working.

Mobility

Excluding secondment opportunities, employment does not confer any right of mobility or transfer to a position in any other part of NICS (including any government department or agency) or to any non-departmental public body or other public body.

Probationary period

There will be a probationary period of six months and continued employment is dependent on the outcome of this. During the probationary period, your performance will be regularly monitored and we reserve the right to extend it for such further period or periods as considered reasonably necessary to assess your performance further.

Additional information

If you are being considered for appointment, we will ask you to complete the AccessNI application form for a basic disclosure certificate. Full details will be provided with an offer of employment. Instructions can be found at www.nidirect.gov.uk/accessni.

You should not be put off applying because you have a conviction. We deal with all criminal record information in a confidential manner and information relating to convictions is destroyed after a decision is made. Criminal record information is subject to the provisions of the Rehabilitation of Offenders (NI) Order 1978.

As a Utility Regulator employee, you will be subject to various office policies, for example, rules on shareholdings, conflicts of interest and future appointments.

Proof of right to work in the UK and visa conditions

As part of our pre-employment checks, we are required by law to verify your right to work in the United Kingdom. The following conditions related to any future offer or employment with the Utility Regulator are detailed below.

You must provide satisfactory evidence of your right to work in the United Kingdom prior to commencing employment. Acceptable documents include, but are not limited to:

- A valid passport.
- National identity card or Home Office registration certificate.
- United Kingdom Border Agency work document if you need permission to work.

Employers can face unlimited fines if they employ illegal workers and need to make sure that no one they employ is working in the United Kingdom illegally. However, to protect themselves against discrimination laws they should treat all job applicants equally. So don't be offended if you're asked to prove your nationality, as all those who are made an offer of employment will be asked to provide proof of right to work. Please refer to the Home Office guidelines for a complete list of acceptable documents.

If your right to work in the United Kingdom is based on a visa or work permit, any future offer of employment is conditional upon:

- You providing a copy of your valid visa or work permit.
- The duration of which your visa or work permit covers.
- You maintaining your right to work status throughout your employment.

For further support on working in Northern Ireland, please visit www.nidirect.gov.uk/articles/working-northern-ireland or www.gov.uk/browse/visas-immigration/what-you-need-to-do

Please note that, if your application is shortlisted for interview, you will be asked to provide one of the above documents. Should you fail to do so, you may not be eligible to proceed. The successful candidate will be required to produce the same document in its original format before commencing employment.
