Utility Regulator

About the Utility Regulator

The Utility Regulator is the independent non-ministerial government department responsible for regulating Northern Ireland's electricity, gas, water and sewerage industries, to promote the short and long-term interests of consumers.

We are not a policy-making department of government, but we make sure that the energy and water utility industries in Northern Ireland are regulated and developed within ministerial policy as set out in our statutory duties.

We are governed by a Board of Directors and are accountable to the Northern Ireland Assembly through financial and annual reporting obligations.

We are based at Millennium House in the centre of Belfast. The Chief Executive and two Executive Directors lead teams in each of the main functional areas in the organisation: CEO Office; Price Controls; Networks and Energy Futures; Markets; Consumer Protection and Enforcement. The staff team includes economists, engineers, accountants, utility specialists, legal advisors and administration professionals.

Utility Regulator

OUR MISSION

To protect the short and long-term interests of consumers of electricity, gas and water.

OUR VISION

To ensure value and sustainability in energy and water.

OUR VALUES

ACCOUNTABLE: We take ownership of our actions.

TRANSPARENT: Ensuring trust through openness and honesty.

COLLABORATIVE: Connecting and working with others for a shared purpose.

DILIGENT: Working with care and rigour.

RESPECTFUL: Treating everyone with dignity and fairness.

ABSTRACT

The Quarterly Retail Energy Market Monitoring (QREMM) report is the latest of a series of Utility Regulator (UR) reports (previously known as the Quarterly Transparency Reports (QTRs)) that provide a range of information about the retail energy market in Northern Ireland (NI).

The data relates mainly to market shares, market activity and domestic prices in the electricity and gas retail markets. The data also includes information on non-domestic, or industrial and commercial (I&C), prices.

We collect and monitor market information through the Retail Energy Market Monitoring (REMM) framework.

The information shown in this report comes from network companies, suppliers, DESNZ (Department for Energy Security and Net Zero) and Eurostat. Some figures have been calculated internally.

AUDIENCE

Electricity and gas industry, government departments, associations of consumers, regulators, statistical bodies, suppliers, potential new market entrants, consultants, researchers and journalists.

CONSUMER IMPACT

The information used to produce these reports allows us to monitor the retail market, flag potential concerns and to inform regulatory decisions. All of this directly impacts on consumers.

This report increases transparency for consumers on matters of their direct interest, such as the active suppliers in each energy market sector and NI prices compared against other jurisdictions.

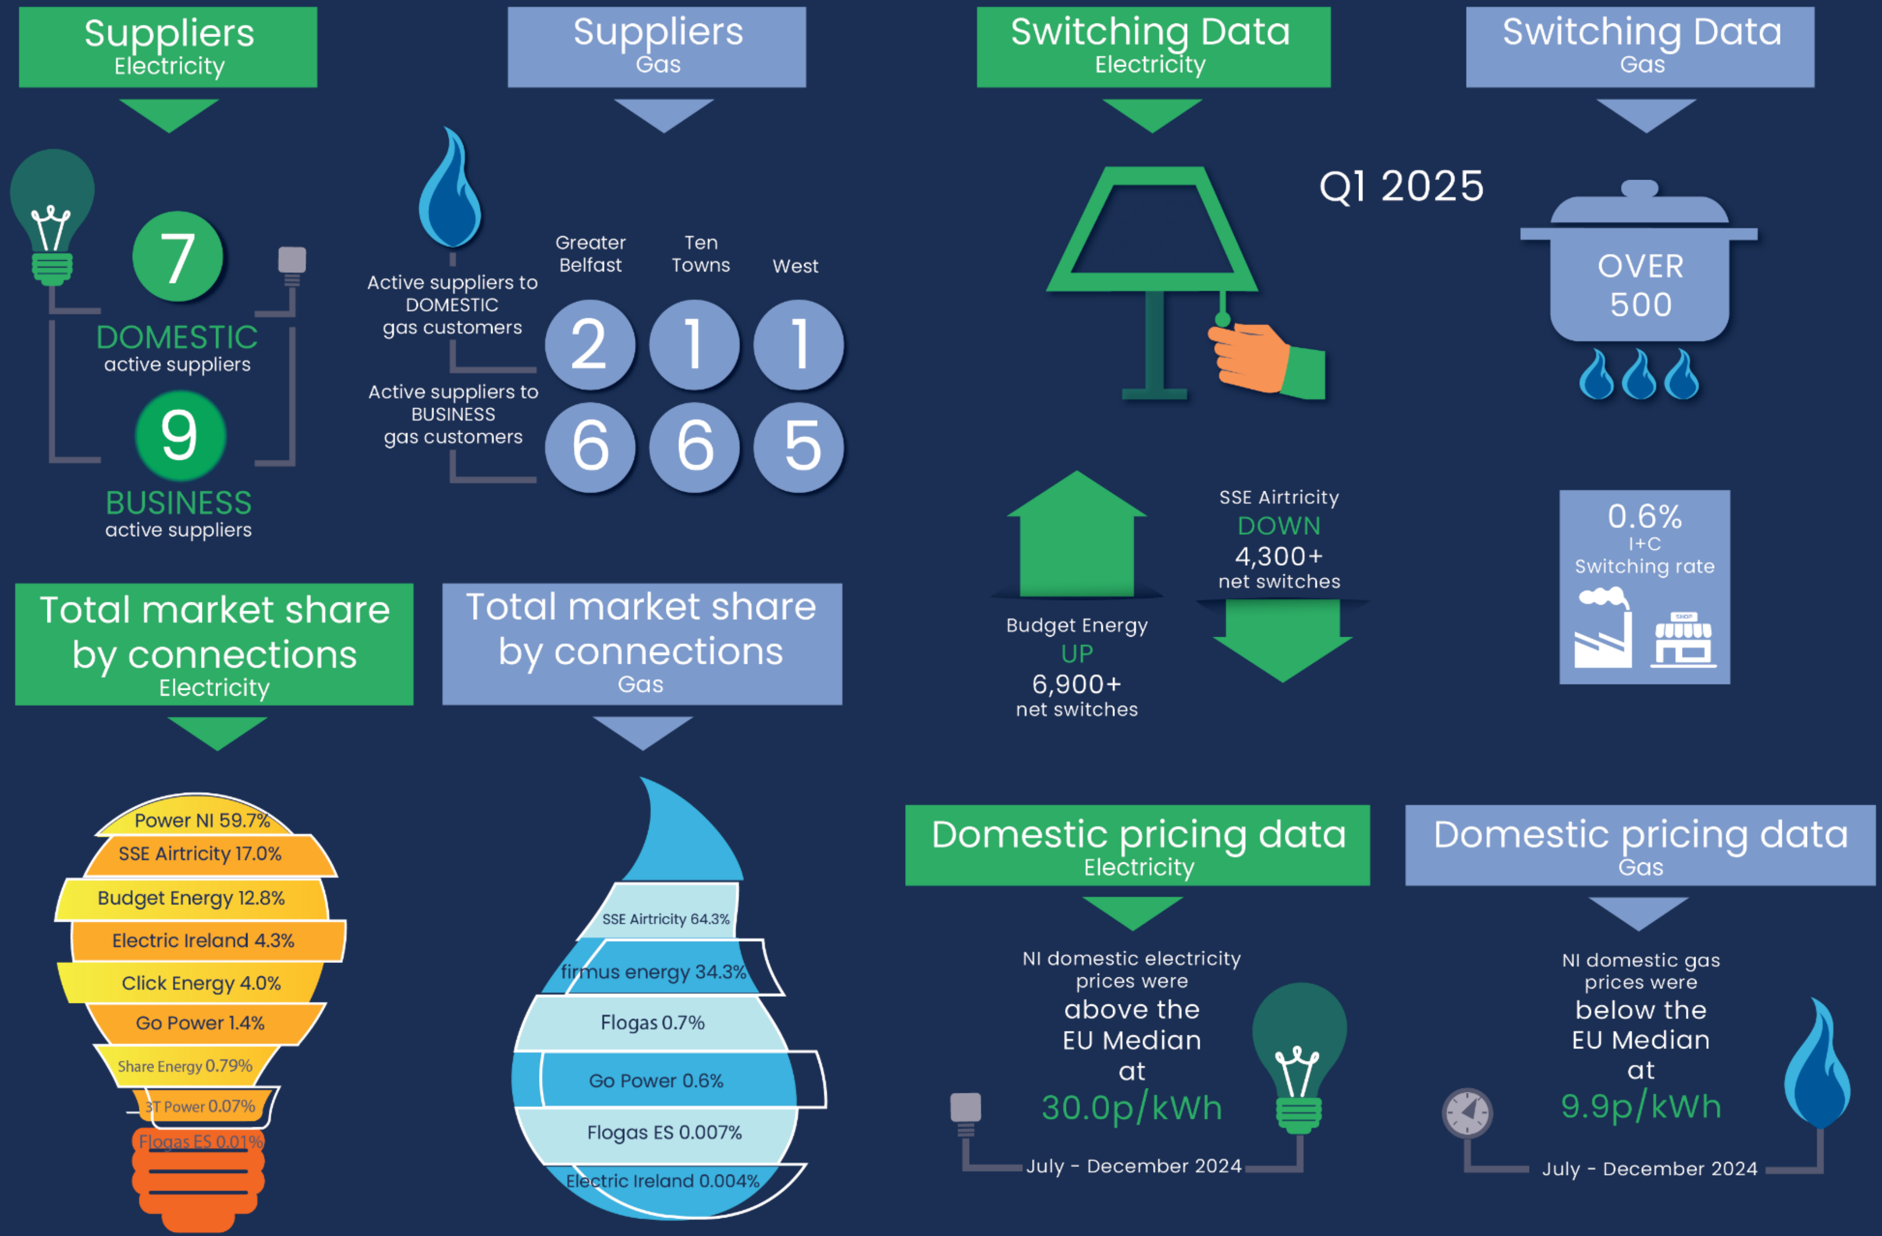
Northern Ireland Retail Market Monitoring Quarter 1 2025



1. Key developments during Q1 2025

1. Overall electricity switching activity in Q1 2025 decreased from the previous quarter. Domestic customers continue to engage in the market with over 21,700 domestic switches completed during Q1 2025, a switching rate of 2.6% (a decrease from 2.8% in Q4 2024). The I&C sector saw no change in the electricity switching, with a rate of 1.5% in Q1 2025 and Q4 2024.

2. In the gas sector, domestic switching in the Greater Belfast area saw c442 switches completed during Q1 2025 (an increase from c391 in Q4 2024). I&C in NI saw a decrease in switching activity from 1.6% in Q4 2024 to 0.6% in Q1 2025.

3. The semester 2 (July to December) 2024 electricity pricing data is sourced from Eurostat, DESNZ and individual supplier's submissions under the REMM framework. The pricing data for the period illustrates the following:

   - NI domestic electricity prices (30.0 p/kWh) were below Ireland (31.3 p/kWh) but above the UK (28.7 p/kWh) and the EU median (22.9 p/kWh).
   - The NI I&C electricity price for the Very Small connections (which represent c71% of I&C connections) was 28.5 p/kWh, which was lower than the UK (31.5 p/kWh) and Ireland (31.4 p/kWh) but higher than the EU median (22.7 p/kWh).
   - For Large and Very Large I&C customers (c0.03% of connections) NI prices (16.9 p/kWh) were slightly below Ireland (17.4 p/kWh) and significantly below the UK (24.9 p/kWh) but again higher than the EU median (10.6 p/kWh).

4. The semester 2 (July – December) 2024 gas pricing data is sourced from Eurostat, DESNZ and individual supplier's submissions under the REMM framework. The pricing data for the period illustrates the following:

   - NI domestic gas prices for NI (9.9 p/kWh) were below Ireland (11.3 p/kWh) and the EU (10.7 p/kWh). This was higher than the UK (6.8 p/kWh).
   - The NI I&C gas price for the Very Small connections was 8.7 p/kWh, which was above the EU median (7.9 p/kWh) and Ireland (8.6 p/kWh), but below the UK (9.3 p/kWh).
   - For Medium and Large I&C customers NI gas prices (5.8 p/kWh) were higher than the EU median (3.9 p/kWh) and Ireland (3.2 p/kWh), but below the UK (4.5 p/kWh).

2. Introduction

2.1 The purpose of this report is to deliver transparency for stakeholders and consumers, providing readers with readily accessible information on the evolution and performance of Northern Ireland (NI) electricity and natural gas retail sectors.

2.2 This report is one of the tools we use to communicate some of the main indicators we monitor in the retail energy markets. We protect consumers by promoting effective competition wherever appropriate, and by monitoring the markets. Therefore, monitoring the retail markets is key when complying with our statutory duties[1].

[2] Phoenix Natural Gas Ltd
[3] Firmus Energy (Distribution) Ltd
[4] Evolve Network, previously known as SGN up to September 2023
[5] Flogas Enterprise Solutions, previously known as Naturgy Ltd.

2.3 The electricity and gas (in the Greater Belfast area) markets have been open to competition to domestic customers since 2007. However, there were no competing suppliers in the domestic market until 2010.

2.4 The Ten Towns area opened to gas competition for large I&C customers (those consuming over 732,000 kWh per annum) in 2012, and to domestic and small I&C customers in 2015. The first gas connection to the West gas distribution area was a large I&C user during 2017.

2.5 During the fourth quarter of 2024 there were **nine** suppliers in the electricity market and **six** suppliers in the gas market although not all of these suppliers are certified to operate in all sectors (or in all gas distribution areas).

2.6 The detail of the dates of entry for the suppliers in each of the retail market segments is available in Annex B of this report. For more information about the retail energy market in NI, please visit: https://www.uregni.gov.uk/supply.

Total NI electricity market shares by connections

3.1 The chart[6] to the right shows the percentage market share by connections[7] for each electricity supplier at the **end of March 2025**.

3.2 When looking at the electricity retail market as a whole by connections (domestic and I&C customers), Power NI, the incumbent supplier, has the leading position with 59.7% share of the market.

3.3 Electric Ireland announced on 9 May 2024 that they would be leaving the domestic electricity market[8]. Share Energy entered the market in September 2024.

4. Electricity pricing – semester 2 2024

4.1 **<u>Domestic price</u> comparison with EU:** In the domestic graphs shown, we use unit prices which include Climate Change Levy (CCL) and include VAT as this reflects the final prices paid by domestic customers. The medium sized domestic customers (annual consumption of between 2,500 and 4,999 kWh) have been selected for the purpose of analysis, as this consumption category reflects the majority of domestic customers in NI.

4.2 Figure 11 shows for semester 2 2024[10] (July – December) the NI price was lower than Ireland, and higher than the EU median and UK.

4.3 Figure 12[11] shows the medium domestic connections unit price[12] (incl. all taxes) over the last five years compared to the EU median, UK and Ireland.

4.4 For semester 2 (July to December) 2024 the domestic electricity prices for NI (30.0 p/kWh) were below Ireland (31.3 p/kWh) but above the UK (28.7 p/kWh) and the EU median (22.9 p/kWh).

Figure 11: Medium domestic connections unit prices incl. all taxes (July - December 2024)

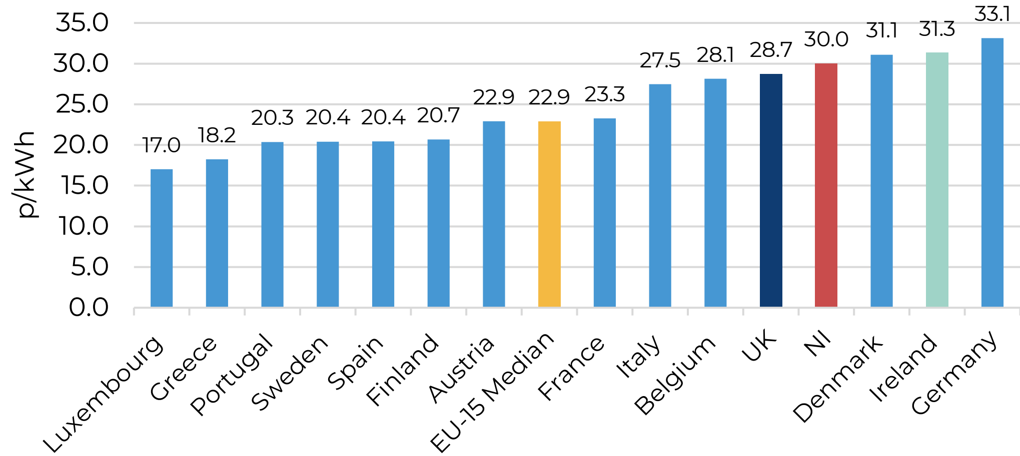

Figure 12: Medium domestic connections - unit price over time

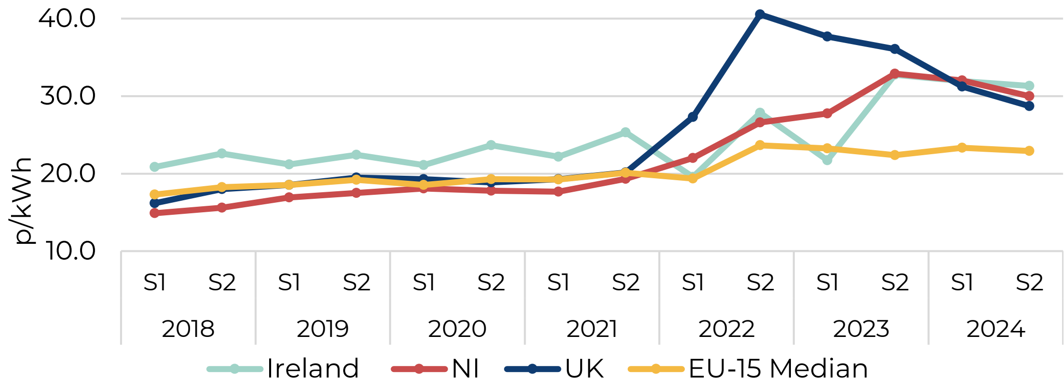


Data source: NI electricity suppliers, DESNZ, Eurostat and UR internal calculations

[10] The pricing data relates to the period end Q2 2024 (S1 January - June 2023). This is due to the timing of the availability of pricing data from Eurostat, DESNZ and Suppliers.

[11] UK data was revised values for UK 2024 S1

[12] Various governments across the EU have taken different actions to mitigate against rising energy costs. This Eurostat article provides some information on the measures implemented for domestic electricity consumers – link.

DATA DOWNLOAD

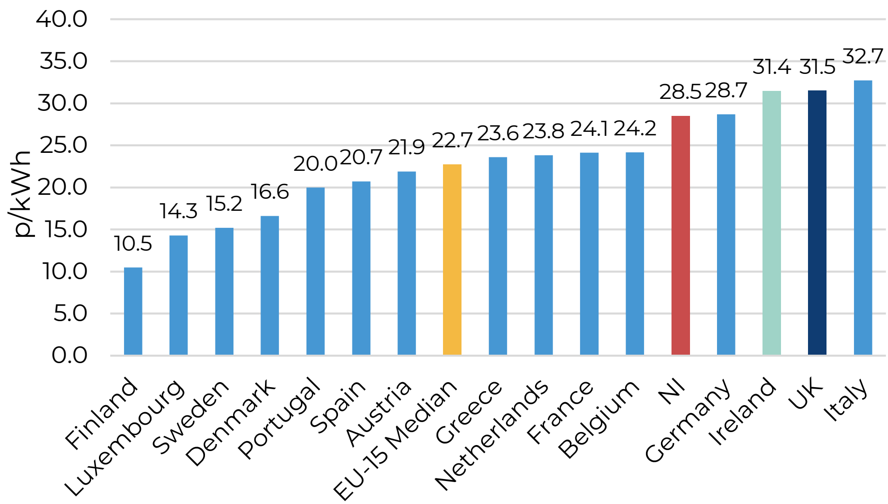
4.5 **<u>I&C price</u> comparison with EU**[13]: The graphs below show I&C electricity prices in the 15 EU[14] countries (converted to GBP) and in NI, per consumption size bands (following standard EU categorisation). The I&C graphs use unit prices which include Climate Change Levy (CCL) but exclude VAT, as VAT is a refundable expense for many businesses. This reflects the final prices paid by I&C customers. We amalgamate the two largest categories of annual consumption (large and very large connections) to avoid any confidentiality issues in sectors where there are a small number of customers and suppliers involved.

4.6 During semester 2 2024 (July – December) the NI prices in the very small I&C category were higher than the EU median, but lower than Ireland and UK (c71% of I&C connections in NI are in this size category). During the same period, for the large and very large I&C customers (c0.02% of connections), NI prices were lower than the UK and Ireland, but higher than the EU median[15].

Table 8: I&C connections and consumption end of Q4 2024

Size of Customer	Annual Consumption bands (MWh)	% of I&C connections	% of I&C consumption	I&C connection numbers
Very small	< 20	70.9%	6.1%	54,318
Small	20 – 499	27.7%	32.5%	21,233
Small / Medium	500 – 1,999	1.0%	17.4%	790
Medium	2,000 – 19,999	0.3%	28.2%	241
Large & Very Large	>20,000	0.02%	15.8%	19

Figure 13: Very small connections prices excl. VAT, incl. other taxes



Data source: NIEN

[13] Various governments across the EU have taken different actions to mitigate against rising energy costs. This Eurostat article provides some information on the measures implemented for non -domestic electricity consumers – link.
[14] Some graphs do not include all 15 EU countries due to availability of data from Eurostat.
[15] The pricing data relates to the period end Q4 2024 (S2 July - December 2024). This is due to the timing of the availability of pricing data from Eurostat, DESNZ and Suppliers.

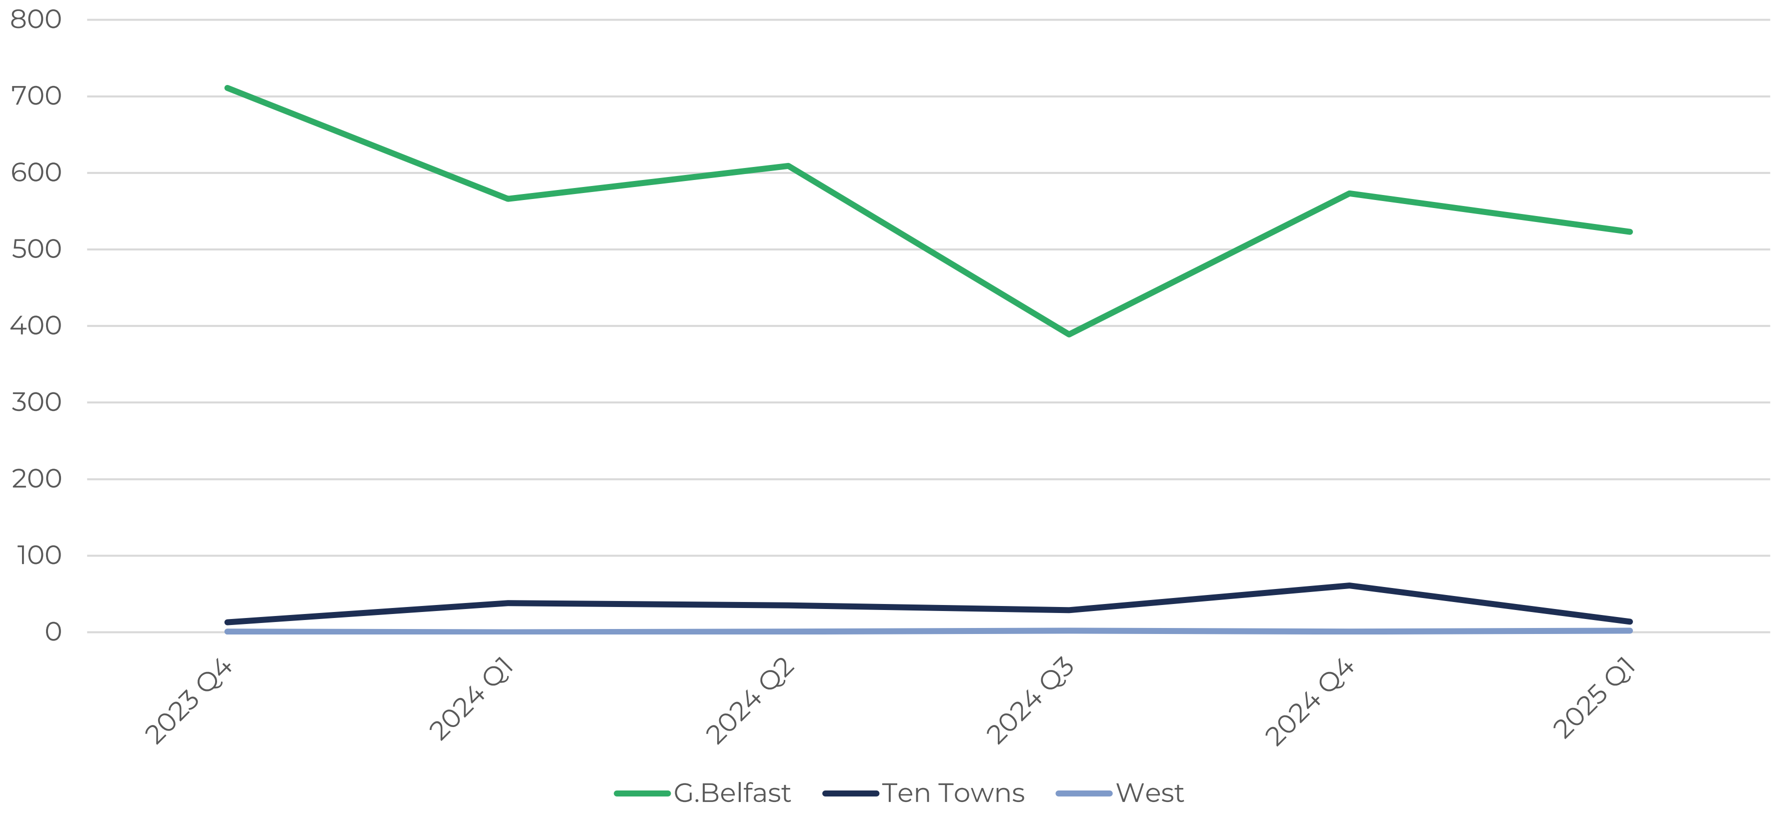
Market activity - switching

5.6 The graph below shows the market activity through changes of supplier (CoSs) on a quarterly basis in the NI gas market (domestic and I&C) across the three distribution areas. The table that follows shows the number of switches and switching rate[21] per quarter.

Figure 29: Gas - quarterly total change of supplier



Data source: PNGL / FeDL / Evolve

[21] The switching rate percentages are calculated using the number of quarterly switches divided by the number of customers at the end of the quarter in the relevant market.

DATA DOWNLOAD

5.7 Greater Belfast is the only distribution area in which there is competition within the domestic credit and prepayment[22] sectors. The Figure below reflects the monthly change of customer numbers (gains), per market segment within the domestic sector. The table shows the total domestic gains and switching rate per quarter.

Figure 30: Gas - monthly domestic switches (G.Belfast)

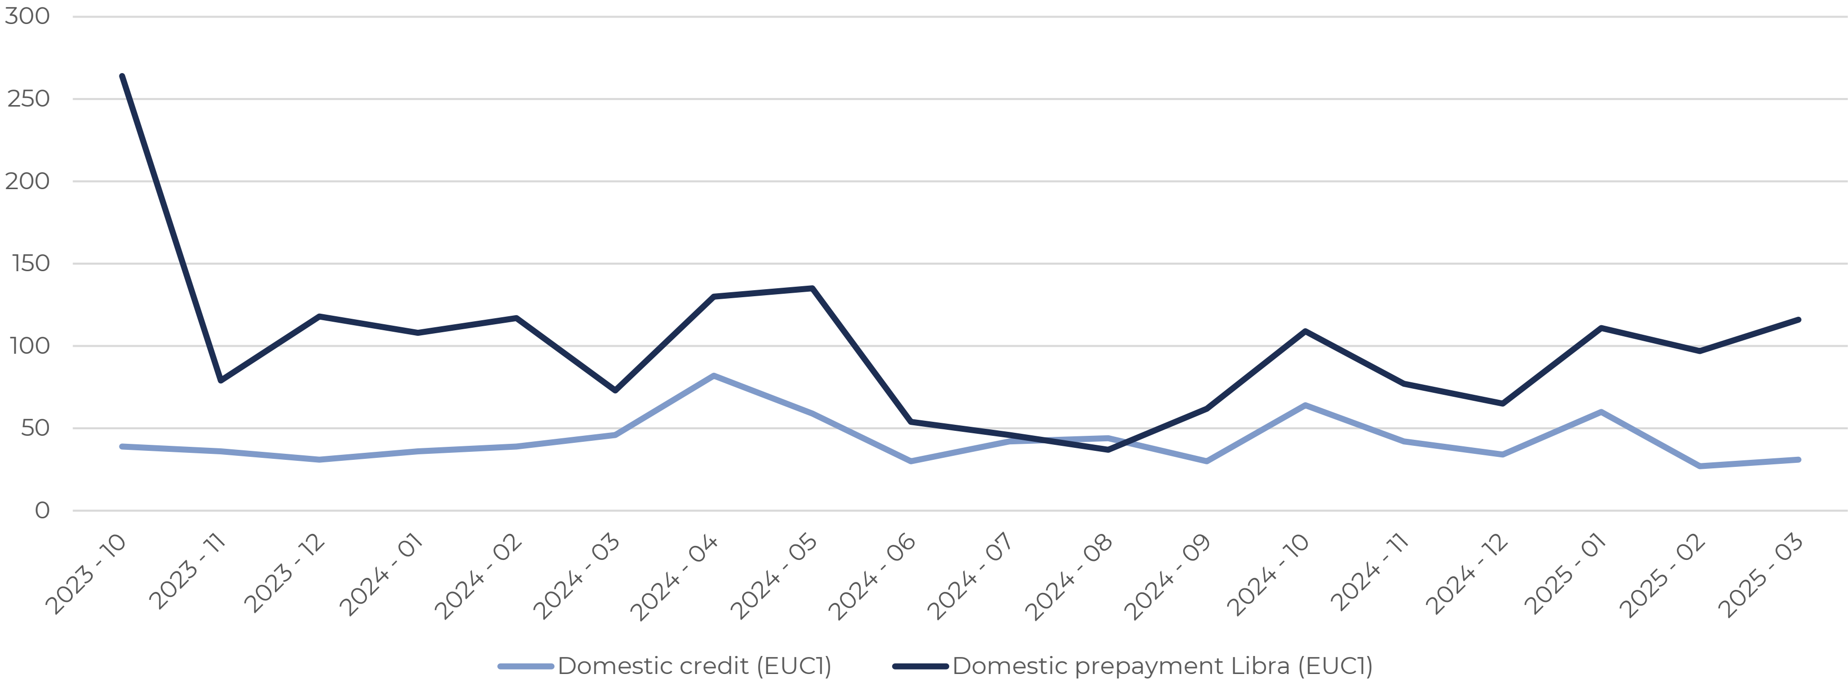


Table 13: Switching rate - domestic market (G. Belfast only)

Quarter	2023 Q4	2024 Q1	2024 Q2	2024 Q3	2024 Q4	2025 Q1
No. of switches	567	419	490	261	391	442
Switching rate (%)	0.2%	0.2%	0.2%	0.1%	0.2%	0.2%

Data source: PNGL

[22] Note that prepayment switches, within the domestic sector, include switches back to the previous supplier in cases where the customer has not taken the required action to complete their switch.

6. Gas pricing – semester 2 2024[23]

6.1 The pricing data detailed in this report is for the semester July – December 2024 (S2 2024). In the domestic graph to the right, we use unit prices which include Climate Change Levy (CCL) and include VAT, as this reflects the final prices paid by domestic customers. The medium sized domestic customers (annual consumption between 5,557 - 55,557 kWh) have been selected for the purpose of analysis, as this consumption category reflects the majority of domestic customers in NI.

6.2 The NI unit price is the average pence per kWh for medium customers for the Greater Belfast, Ten Towns and West network areas. For semester 2 2024 (July – December), the NI domestic gas prices were lower than Ireland and the EU Median but higher than the UK[24].

Figure 32: Medium domestic connections unit prices incl. all Taxes[25] (July - December 2024)

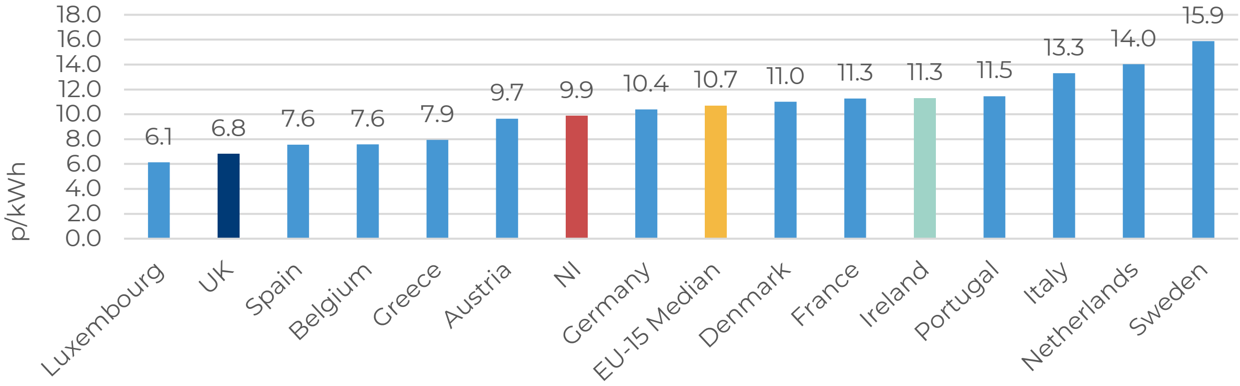

Figure 33: Medium domestic connections - unit price over time[25]

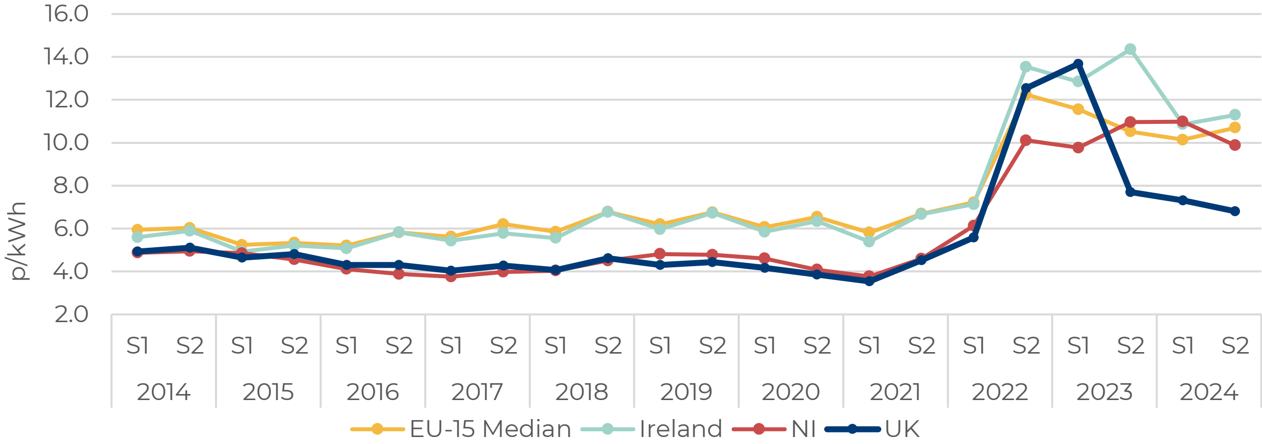

Data source: Eurostat, DESNZ and NI gas suppliers collated by UR

[23] Various governments across the EU have taken different actions to mitigate against rising energy costs. This Eurostat article provides some information on the measures implemented for domestic electricity consumers – link.

[24] The pricing data relates to the period end Q4 2024 (S2 July - December 2024). This is due to the timing of the availability of pricing data from Eurostat, DESNZ and Suppliers

[25] UK data was revised values for UK 2024 S1

DATA DOWNLOAD

6.3 **<u>I&C price</u> comparison with EU**: The graphs below show I&C gas prices. Similar to the electricity prices above they use unit prices which include Climate Change Levy (CCL) but exclude VAT, as VAT is a refundable expense for many businesses. This reflects the final prices paid by I&C customers. We also amalgamate the two largest categories of annual consumption (medium and large connections) to avoid any confidentiality issues in sectors where there are a small number of customers and suppliers involved.

6.4 During semester 2 2024 (July - December), the NI prices in the very small I&C category were above the EU median and Ireland but below the UK (c86% of I&C connections in NI are in this size category). During the same period, for the medium and large I&C category, NI gas prices were above the UK, Ireland and the EU.

Figure 34: Very small connections prices excl. VAT, incl. other taxes

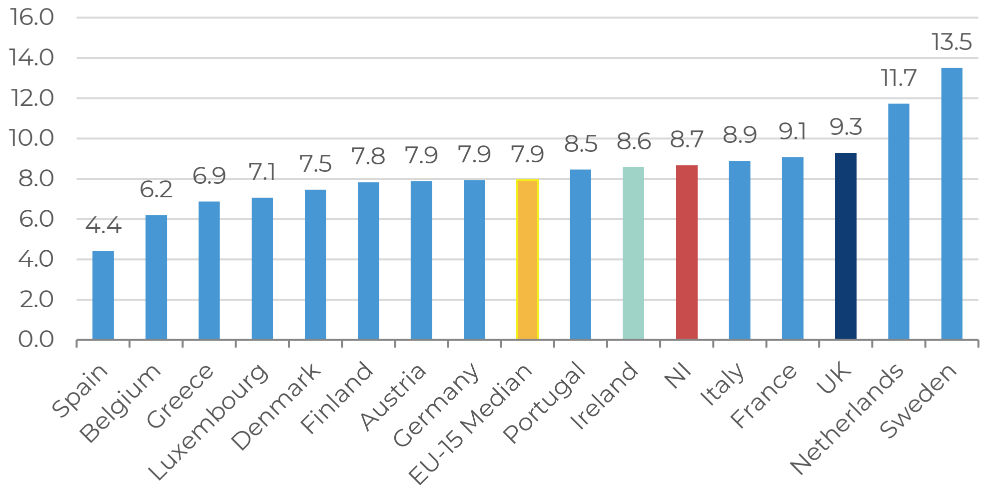

Figure 35: Small connections prices excl. VAT, incl. other taxes

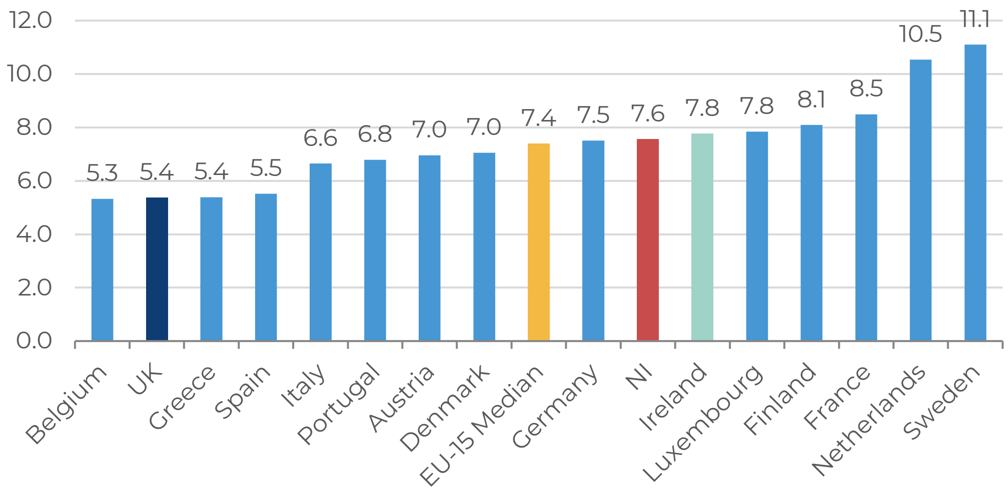

Figure 36: Medium and large connections prices* excl. VAT, incl. other taxes

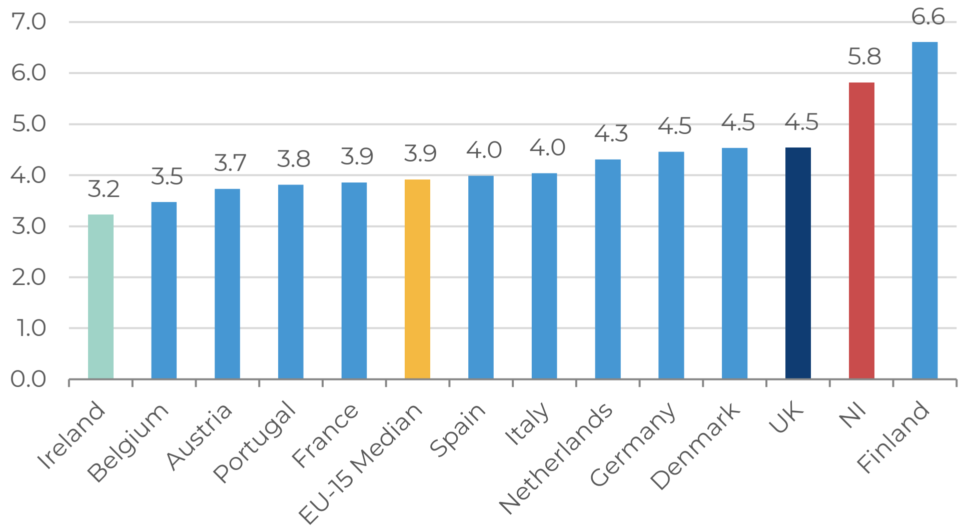

Data source: Eurostat, DESNZ and NI gas suppliers collated by UR

*The prices data for medium and large connections for Sweden, Luxembourg, and Greece was categorised as "confidential" on Eurostat for Semester 2 2024

Annex A: Background & Sources

Purpose, methodology and data sources

The framework in which this quarterly report lies is called Retail Energy Market Monitoring (REMM) which was introduced in 2015. The ultimate objective of introducing this enhanced framework was to develop the current monitoring of retail indicators, and to provide increased transparency in the retail energy markets in NI.

The main data sources for this report are as follows:

1. Connections and consumption, market shares and market activity information are provided by the network companies:
2. Northern Ireland Electricity Networks (NIEN) for electricity data; and
3. Phoenix Natural Gas Limited (PNGL), firmus energy (Distribution) Limited (feDL) and Evolve Networks for gas data.

EU domestic and I&C electricity prices are from Eurostat and the Department for Energy Security and Net Zero (DESNZ). NI domestic and I&C electricity prices are derived directly from REMM data submitted by suppliers. NI domestic gas prices are also derived from REMM data submitted by suppliers.

Electricity pricing

For the electricity prices section, we follow Eurostat's format and methodology. As a result, the average prices for NI are comparable with prices in other EU countries (those published in the DESNZ's Quarterly Energy Prices reports26 and Eurostat data base27) once these figures have been converted to GBP (Note: from 01 January 2021, DESNZ no longer provide pricing data to Eurostat. Therefore, the UK figures reported in the pricing graphs have been obtained directly from DESNZ publicised data).

The base figures are all submitted on a quarterly basis by suppliers, split by domestic and non-domestic (I&C). The UR performs a high-level reasonableness check of the base figures, but the suppliers are responsible for the accuracy of the information that is provided to the UR. The base figures are as follows:

[26] https://www.gov.uk/government/collections/quarterly-energy-prices
[27] http://ec.europa.eu/eurostat/web/energy/data/database

1. **Volume** of electricity sold to consumers.

2. The **value**, or revenue gained from the sale, split into three categories: excluding all taxes, excluding VAT, and including all taxes.

3. The **number** of customers supplied in that particular size category.

The volume and value are used to calculate a NI quarterly average value per size band. This value per unit (per size band) is what we refer to in this paper as "price". For clarity we do not receive from suppliers the actual price paid by their customers. Instead, we calculate the average value or revenue collected per unit in that particular size category, as per the Eurostat methodology.

As the Eurostat figures are published on a semester basis (semester 1 (S1) January to June and semester 2 (S2) July to December) we therefore average the two relevant quarters to obtain the comparable six-month period for NI.

It should be noted that the comparability of the derived NI prices to the other Member States can be greatly affected by fluctuations in the Euro GBP exchange rate. For the purposes of tariff comparisons, we convert the EU tariff data from Euro to GBP using the monthly average exchange rate applicable for the semester (published by Eurostat). Therefore, tariff movements and comparisons between NI and other Member States can be impacted by both an increase and decrease in a tariff and/or also by any variation in exchange rates.

Gas pricing

The gas prices section also follows the Eurostat format and methodology (as outlined in Electricity Prices). As a result, the average prices for NI are comparable with prices in other EU countries (those published in DESNZ's Quarterly Energy Prices reports[28] and Eurostat data base[29]) once these figures have been converted to GBP.

Electricity wholesale market monitoring data

Readers should also be aware of the Monthly Market Monitoring Report which provides an overview of the SEM and sets out recent trends in the market in relation to pricing, demand, scheduling and contract prices. It focuses in particular on the wholesale element of electricity prices, which makes up roughly 60% of customers' bills. These reports[30] are prepared by the Market Monitoring Unit (MMU) within the UR in joint collaboration with the Commission for Regulation of Utilities (CRU).

[28] www.gov.uk/government/collections/quarterly-energy-prices
[29] http://ec.europa.eu/eurostat/web/energy/data/database
[30] The latest SEM market monitoring report is here

Northern Ireland gas markets

The gas distribution network licensees are responsible for the medium and low-pressure mains that convey to the licensed areas throughout Northern Ireland. There are three Distribution Network Operators[31] (DNOs) who operate in separate distribution areas as follows:

1. firmus energy (Distribution) Ltd (feDL) from the North West through the Central region to the Southern areas of Northern Ireland;
2. Phoenix Natural Gas Ltd (PNGL) mainly Greater Belfast, Larne and an extension into East Down; and
3. Evolve Network Ltd (formerly SGN Natural Gas Ltd) in the West of Northern Ireland.

Each DNO owns and manages the natural gas distribution network in their distribution area. Those companies who supply gas (suppliers) pay the relevant DNO a fee to transport natural gas and then sell it straight to the consumer. Although a DNO is responsible for making sure the natural gas reaches individual homes, it is the responsibility of the gas supplier to bill consumers for the gas they use.

Annex B: Supplier entry to NI retail markets

The tables below set out the dates that each supplier entered the retail market sectors.

Electricity	
Domestic	Incumbent supplier: Power NI June 2010: SSE Airtricity June 2009: firmus supply June 2011: Budget Energy October 2011: Electric Ireland October 2015: Click Energy October 2015: Open Electric December 2016: Open Electric ceased supply October 2019: Go Power November 2020: Bright Energy January 2022: Bright Energy ceased supply September 2024: Share Energy
I&C	Incumbent supplier: Power NI July 1999: ESB Independent Energy (NI) t/a Electric Ireland August 1999: Energia January 2008: SSE Airtricity April 2009: firmus supply[35] July 2011: Budget Energy February 2012: VAYU (Naturgy as of 29th November 2018) (Flogas Enterprise Solutions Ltd as of 20th December 2021) April 2012: Go Power October 2015: Click Energy April 2018: 3T Power October 2019: Energia supply business transferred to Power NI September 2024: Share Energy

Gas: Greater Belfast[32]	
Domestic	Incumbent supplier since September 1996: SSE Airtricity[33]
I&C	Incumbent supplier since September 1996: SSE Airtricity September 2008: firmus energy March 2009: Vayu (Naturgy as of 29th November 2018) (Flogas Enterprise Solutions Ltd as of 20th December 2021) May 2013: Electric Ireland August 2014: Go Power December 2014: Flogas

Gas: Ten Towns[34]	
Domestic	Incumbent supplier since 2005: firmus
I&C	Incumbent supplier since 2005: firmus January 2013: SSE Airtricity May 2015: Flogas June 2015: Go Power January 2017: Vayu (Naturgy as of 29th November 2018) (Flogas Enterprise Solutions Ltd as of 20th December 2021) April 2017: Electric Ireland

Gas: West[36]	
Domestic	July 2017 Designated Commissioning Supplier: SSE Airtricity
I&C	January 2017: Electric Ireland July 2017: SSE Airtricity January 2018: Flogas Q1 2019: firmus energy Q3 2019: Go Power

[32] The Greater Belfast area is defined in Schedule 1 of the Phoenix Natural Gas Limited conveyance licence.
[33] Formerly Phoenix Supply Ltd (PSL).
[34] The Ten Towns area is defined in Schedule 1 of the firmus energy (Distribution) Limited conveyance licence.
[35] Note that firmus supply left the electricity market at the end of 2015.
[36] The West area is defined in Schedule 1 of the Scotia Gas Networks Northern Ireland Ltd (Distribution) Limited conveyance licence.

Glossary

CCL	The Climate Change Levy (CCL) is a tax on electricity, gas and solid fuels delivered to I&C consumers. Its objective is to encourage businesses to reduce their energy consumption or use energy from renewable sources. The rate changes every year.	Ofgem	Office of the Gas and Electricity Markets
CoS	Change of supplier	PNGL	Phoenix Natural Gas Limited
EU	European Union	Q	Quarter. In this report, Q refers to the calendar year (i.e. Q1 refers to the quarter January-March).
Eurostat	Statistical office of the EU. Its task is to provide the EU with statistics at European level that enable comparisons between countries and regions	QTRs	Quarterly Transparency Reports published by the UR at the end of the second month after each calendar quarter (at the end of Feb, May, Aug and Nov).
feDL	firmus energy (Distribution) Limited	REMM	Retail Energy Market Monitoring
firmus energy	firmus energy (Supply) Limited	SEM	Single Electricity Market
GB	Great Britain	SGN NG	SGN Natural Gas
GBP	Great British Pound	S1	Semester 1
I&C	Industrial and Commercial	S2	Semester 2
kWh	Kilowatt hour. Unit of energy equivalent to one kilowatt (1kW) of power expended for one hour (1h) of time. 1,000kWh = 1MWh. 1,000MWh = 1GWh.	UR	Utility Regulator
NI	Northern Ireland	VAT	Value Added Tax
NIEN	Northern Ireland Electricity Networks	UK	United Kingdom
