**Date: 12 September 2025**

**Our Ref: NET/E/JF/1352**

Dear Noel,

**Application for consent to a longer period for the issuance of a Connection Offer at [REDACTED], Wellington Road, Enniskillen, NIE Networks Reference: 25/05525.**

Thank you for your letter received 9 September 2025 (the **Letter**) setting out an application (**the Application**) made by NIE Networks Limited (**NIE Networks**) for an extension to the period within which NIE Networks is required to make a connection offer (**the relevant Connection Offer**) for a New Commercial Connection (950kVA), at [REDACTED], **Wellington Road, Enniskillen**. The extended period now applied for expires on **11 October 2025**.

In this letter we shall refer to the person making the application for the relevant Connection Offer as the **Connection Applicant**.

## **1. The Application**

The Letter describes the relevant background<sup>1</sup> to the Application. Reference is made to Condition 30 of NIE Networks' licence authorising participation

---

<sup>1</sup> What follows is a summary of the Application. It is not intended to be a complete rehearsal. All parts of the Application have been considered in making the decision set out in this correspondence. Failure to mention parts of the Application (or related correspondence) should not be taken as representing any failure to have regard to those parts.

in the activity of distribution (**the Licence**).<sup>2</sup>

Condition 30 (6) (of the Licence) provides that (barring specified exceptions)  
<sup>3</sup> NIE Networks is obliged to make an offer for connection to the distribution system *as soon as practicable* and (by operation of Condition 30 (6)(b)) *in any event within 3 months*

*“after receipt by [NIE Networks] of an application containing all such information in relation to the required connection as [NIE Networks] may reasonably request.”*

Condition 30 (6) is to be read alongside and reflects the provision made in Article 20(3) through to Article 20(5) of the Electricity (NI) Order 1992 (the **Electricity Order**).

Condition 30 (7) of the Licence allows NIE Networks to make an application to the Authority<sup>4</sup> (following requisite consultation) for a consent (in writing) that the period specified in Condition 30 (6)(b) shall be substituted by a longer period and subject to any conditions as specified in the consent.

Significantly, the making – or grant - of a Condition 30(7) type application does not alter NIE Networks’ licence obligation<sup>5</sup> (under Condition 30(6)(a)) to make a connection offer *as soon as practicable*. The primary obligation (recorded in Condition 30(6)(a) of the Licence and Article 20 the Electricity Order) - to make a connection offer *as soon as practicable* - remains.

NIE Networks states as part of the Application, that it received a valid application (for the Relevant Connection Offer) from the Connection Applicant on 11 June 2025, for a New Commercial Connection (950kVA), meaning the existing Condition 30 (6) period expires on 11 September 2025.

The Application (made in the Letter) is for consent – under Condition 30(7) - for a longer substituted Condition 30 (6)(b) period out to 11 October 2025.

---

<sup>2</sup> [NIE Distribution Licence](#).

<sup>3</sup> Recorded in Article 21 of the [Electricity \(NI\) Order 1992](#) (**the Electricity Order**): see Condition 30(6) (d) of the Licence.

<sup>4</sup> In this correspondence we use the words “us” “we” “our” “UR” “Utility Regulator” and “Authority” interchangeably to refer to the Northern Ireland Authority for Utility Regulation.

<sup>5</sup> Which aligns with the statutory duties reflected in Articles 19 and 20 of the Electricity Order.

Although NIE Networks says the dedicated team for demand connections has been growing and still continuing to grow with new members being trained, along with a new approach to queue management being implemented, NIE Networks says that a large number of complex demand applications have been received over the past year.

NIE Networks highlights in the application that the applications *“requested MIC was much lower than the planned installed MIC.”* As a result of this, NIE Networks requested more information from the Applicant, highlighted as *“harmonic data sheets to allow us to complete G5/5 assessments, details of load limiting schemes to allow us to complete G100 assessments and determine protection arrangements.”* This information was received by NIE Networks on 11 July 2025- One month after the Applicant was deemed compliant.

NIE Networks therefore says that the period applied for is needed to complete the design and produce a connection offer.

Reflecting the points above, NIE Networks explains the rationale, ‘given the complex design and high number of applications’, for seeking the consent sought in the Application as allowing:

1. *“NIE Networks time to accurately design and cost connections taking account of the impact of others in the queue ahead of them and the delay caused to design time whilst waiting for additional information from the customer.”*

## **2. Consultation associated with the Application**

Condition 30(7)(a) of the Licence provides that NIE Networks must consult with the Connection Applicant when making an application (for extension) under Condition 30(7).

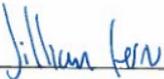

At the time of drafting, NIE Networks have stated that they are still consulting with the customer and will forward the correspondence is due course.

## **3. The Authority’s decision**

Please do return to us should you require any clarification.

Yours sincerely,
