In Progress

BGTL Modification 13

BGTL Code

- Differs from the PTL and GNI(UK) Codes in structure
- Defers to the PTL Code on
 - Nominations
 - Capacity holdings
 - Allocations
 - Balancing and Scheduling
- Common terms for
 - Invoicing
 - Credit
 - Credit Committee rules
 - Governance
- PTL effectively administers the BGTL Code on behalf of BGTL
 - Common System (Aligne)

BGTL Code Modification 13

- PTL and GNI(UK) have issued parallel modifications throughout the NIED project
- Given the BGTL Code's different construction and deference to the PTL Code, the approach was to modify the BGTL Code after the PTL and GNI(UK) modifications were developed
- Only modifications relating to the change in Gas Day and Entry Capacity Transition have been made to date
- Modification 13 does not introduce any new concepts to what has already been consulted on in the PTL and GNI(UK) modifications
- As there is no IP Entry Point on the BGTL network, the changes to the BGTL Code are limited in comparison to the PTL and GNI(UK) Codes
- Key changes:
 - Removal of the old VRF and Short Term Daily Product
 - Updated definitions from the PTL Code
 - Changes to reflect PTL invoicing PS Code Charges on behalf of the 3 TSOs
 - Updated credit procedures
 - Updated accession rules

PRISMA

PRISMA Update

- Since 3rd July it has been possible for Shippers to register on the PRISMA platform and select PTL as one of their TSOs
- Registration process outlined in Industry Workshops on 27th November 2014 and on 27th May 2015
- **Reminder:** Shippers must provide an Authorised Persons list to the applicable NI TSO prior to submitting a registration request on PRISMA
 - Failure to provide this list will result in the application being rejected
- PRISMA in conjunction with the UK and Irish TSOs are planning to organise a training event for Shippers
 - Date and location to be confirmed
 - Provisionally, the event will be held in London during the first half of September
 - TSOs will inform Industry once details have been finalised

Moffat Agent

Moffat Agent

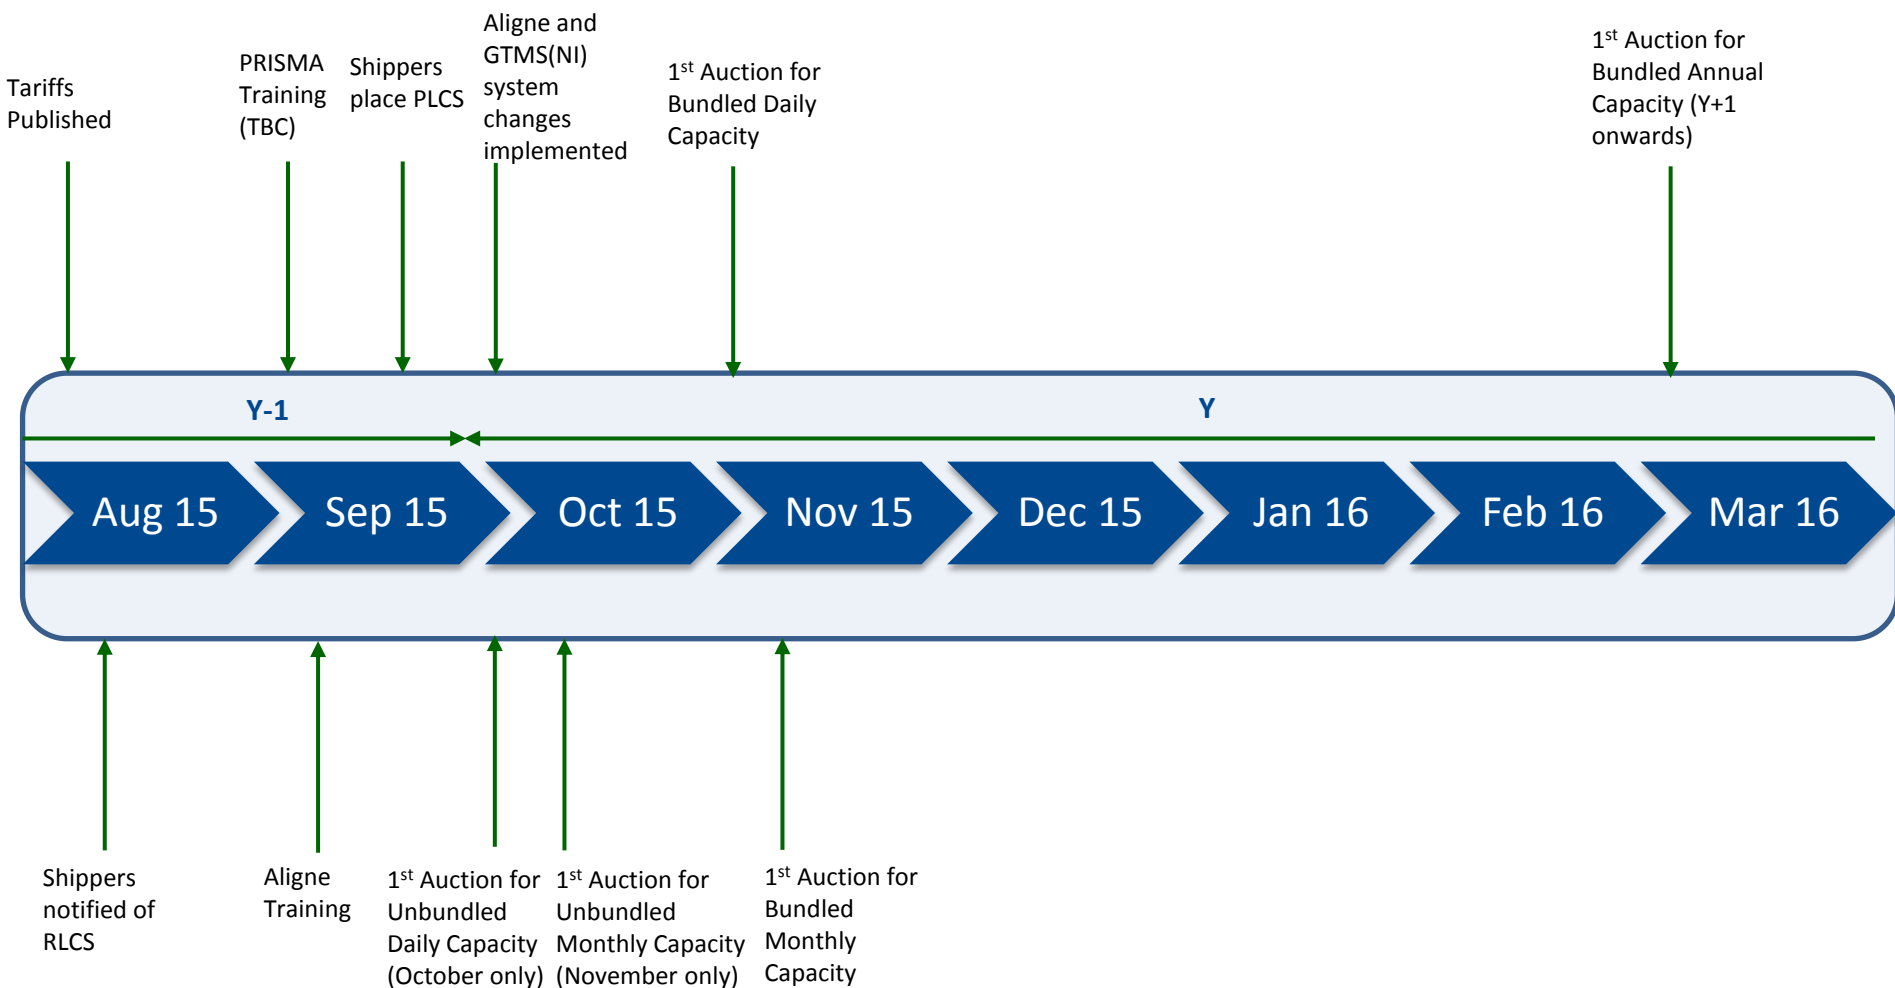

- The working assumption is that the Moffat Agency will cease to handle Nominations and Allocations from Gas Day 30th September 2015
- The new Nominations and Allocations processes are planned to commence on 1st October 2015
- Should the new processes be unavailable on that date, it has been agreed that as a contingency, the Moffat Agency should be utilised for a short period until the new processes can be implemented
- At present, the TSOs do not expect this contingency to be utilised
 - TSO to TSO IT testing to date has produced positive results

Moffat Agent

- A Moffat Agency meeting was held on 22nd July and at that meeting, a vote in principle took place on the following matters:
 - 3 month reappointment of GNI(UK) as operator of the Agency (requires every existing member to sign off on a Renewal Letter)
 - Modifications to the Moffat Administration Agreement:
 - Change Gas Day from 6am – 6am to 5am – 5am
 - Recognise that Gas Day 30th September is a 23 hour gas day
 - Change final renomination time to 02:00
- The members in attendance supported the proposals in principle
- PTL will issue ballot papers once the formal modification text has been provided by the Moffat Agent
- The Moffat Agent advises that any Matching Registrations not currently on the Agent's matrix will need to be established in advance of 1st October.
- "Go"/"No Go" date and communication process is to be agreed
