20th March 2015

Dear Avian

Capacity Allocation Mechanisms - Article 6 of Gas Regulation (EU) 984/2013

Thank you for your submission that sets out the specific steps to be taken by the respective TSOs, Gas Networks Ireland/Gaslink and BGE(UK), to achieve optimisation of Technical Capacity at the relevant Interconnection Point, Gormanston. These specific steps are effective from 4th February 2015.

Having duly considered the specific steps set out in the paper, we have decided that, at this point, it will not be necessary for us to consult on them as we may do under the Article. We would however request that you make these specific steps publically available on your company website. Also, that a summary of the outputs of each meeting is made publically available following each relevant meeting.

The Utility Regulator intends to place your paper and this letter on its website in due course.

Yours sincerely

Tanya Hedley
Director of Compliance & Network Operations
