

## Methodology for production of Supplier Market Share Report

All data is extracted from NIE SAP-ISU system

### Sites Excluded

- Any sites with a MPRN status like (A-Assigned, T – Terminated, D – De-energised).
- All sites with a residential DUoS tariff.
- All sites with a combined DUoS tariff.
- Unmetered sites.
- Transmission connected sites

### Half-hourly metered sites

- New connections from May 2013 are excluded from consumption time bands and customer count.
- Sites that have changed from Non-half-hourly to Half-hourly metering and do not have a full year of interval data are excluded from the consumption bands and customer count.

### Non half-hourly sites

- Data is derived using the latest EUF (Estimated Usage Factor) as of the report run date.
