

Briege,

Please find below Electric Ireland's comments on UR's Draft Forward Work Programme 2018-2019.

Comments

Electric Ireland welcomes the opportunity to respond to Utility Regulator's Draft Forward Work Programme 2018/2019.

The projects proposed during 2018-2019 are a balanced mix of important areas of interest for the coming year and we look forward to contributing as required and to outcomes as they emerge.

A general comment we would make is that outcomes should continue to strike an appropriate balance between achieving desired customer protection and the recognition of the customer service and commercial objectives of suppliers in a competitive and dynamic market, whilst avoiding any unintended consequences for customers.

Regards

Jim Wynne
Regulation Manager Northern Ireland
