

RETAIL MARKET MONITORING

Quarterly Transparency Report

May 2014

Abstract

This paper is the latest of a series of Utility Regulator (UR) reports – the Quarterly Transparency Reports (QTRs) – that provide a range of information about the retail energy market in Northern Ireland (NI).

The data relate mainly to market shares, market activity and domestic prices in the electricity and gas retail markets. Data also include information on non-domestic electricity prices.

The information shown in this report comes from network companies, suppliers, Department of Energy & Climate Change (DECC) and Eurostat. Some figures have been calculated internally.

These reports are released at the end of the second month after each calendar quarter (in Feb, May, Aug and Nov).

Audience

Electricity and gas industry, consumers associations, regulators, statistical bodies, suppliers, potential new market entrants, researchers and journalists.

Consumer impact

This set of reports increases transparency for consumers on matters of their direct interest, such as the active suppliers in each energy market sector, and NI prices compared against other jurisdictions.

They also allow us to monitor the retail market, and flag potential concerns – in terms of switching irregularities, suppliers' activity on specific areas, price comparisons, etc – and inform regulatory decisions. All of this directly impacts on consumers.

1 Summary of key market indicators

2014 Q1	Electricity		GAS: Greater Belfast		GAS: Ten towns	
	Domestic	Non domestic	Domestic and small non-domestic	Large non-domestic	Domestic	Non domestic
Customer numbers/connections at end of quarter	784,057	60,355	165,429	3,189	20,273	2,163
Consumption in quarter (GWh/thousand therms)	907	1,254	25,638	22,106	2,064	14,346
% of prepayment customers within domestic sector	40%		64%		89%	
Number of active suppliers in this quarter	5	8	3	4	1	2
Market shares (by customer numbers/connections) of largest suppliers	Power NI: 73% SSE Airtricity: 20% Budget Energy: 7%	Power NI: 50% SSE Airtricity: 25% Energia: 12%	SSE Airtricity: 72% firmus: 28%	SSE Airtricity: 51% firmus: 48%	firmus: 100%	I&C < 732,000kWh: - firmus: 100% I&C > 732,000kWh: - firmus: 88% - SSE Airtricity: 12%
Market shares (by consumption) of largest suppliers	Power NI: 70% SSE Airtricity: 24% Budget Energy: 6%	SSE Airtricity: 31% Energia: 23% Electric Ireland: 24%	SSE Airtricity: 69% firmus: 31%	SSE Airtricity: 49% firmus: 50%	firmus: 100%	I&C < 732,000kWh: - firmus: 100% I&C > 732,000kWh: - firmus: 90% - SSE Airtricity: 10%
Quarterly switching rate	1.6%	1.5%	1.5%	0.4%		
Prices	Around EU-15 median	Very small customers (0-20 MWh pa): around EU-15 median Rest of I&C (more than 20 MWh pa): on the highest end of EU-15 range	Domestic: lowest in EU-15		Domestic: lowest in EU-15	

2 Introduction

2.1 Methodology and data sources

Monitoring the market is key in fulfilling our statutory duty to protect consumers by promoting effective competition wherever appropriate. We are developing a wider market monitoring framework known as Retail Energy Market Monitoring (REMM) which we will consult on in 2014. As we continue to progress our work in this area, we will continue to make ongoing additions to this set of Quarterly Transparency Reports (QTR's), to ensure a regular and structured flow of relevant information for our stakeholders. In addition, we also produce a series of broader ranging Energy Retail Reports¹ that cover this information annually.

The main data sources for this report are as follows:

- Market shares are provided by the network companies (NIE², PNGL³ and firmus Distribution⁴)
- Electricity switching analysis has been undertaken with inputs from NIE. Gas switching inputs are from PNGL and firmus Distribution, while rates of gas quarterly switching are calculated using gas suppliers figures
- EU domestic energy prices are from DECC⁵. NI domestic prices, for electricity and gas, are collated internally
- EU non-domestic electricity prices are from Eurostat. NI non-domestic electricity data are derived directly from suppliers and collated internally

Non-Domestic Electricity Prices

These results are based on the average electricity unit prices of non-domestic consumers, categorised in terms of their annual consumption.

We have followed DECC's format and methodology when gathering and analysing I&C⁶ prices. As a result, we obtain NI prices that are comparable with prices in other EU countries (those published in DECC's Quarterly Energy Prices reports⁷ and Eurostat data base⁸).

To avoid confidentiality issues, data has been aggregated in the form of 'averages' for the total of NI (per customer size bands), with no individual supplier detail published.

The base figures are obtained quarterly from suppliers, in the following form:

- **volume** of electricity sold to non-domestic consumers
- the **value**, or revenue gained from the sale, split in three categories: excluding all taxes, excluding VAT, and including all taxes
- the **number** of I&C customers supplied in that particular size category

The volume and value are used to calculate a NI quarterly average value gained per size band. This value per unit per size band is what we refer to in this paper as price. For clarity we do not receive from suppliers the actual price paid by their customers. Instead we calculate the value or revenue collected per unit in that particular size category.

² Northern Ireland Electricity

³ Phoenix Natural Gas Limited

⁴ firmus energy (Distribution) Limited

⁵ Department of Energy and Climate Change

⁶ Industrial and Commercial

⁷ <https://www.gov.uk/government/publications/quarterly-energy-prices-december-2012>

⁸ <http://epp.eurostat.ec.europa.eu/portal/page/portal/energy/data/database>

We have also averaged the two relevant quarters to obtain six-month period figures, so we can readily compare NI data with those published by Eurostat for EU members twice per year.

In the graphs shown in this report, we have used unit prices which include Climate Change Levy (CCL)⁹ but exclude VAT, as VAT is a refundable expense for many businesses.

Finally, we have amalgamated the two largest categories of annual consumption (large and very large customers) to avoid confidentiality issues in sectors where there are a very small number of customers and suppliers involved.

2.2 Retail competition in NI energy market

The electricity and gas (in the Greater Belfast and Larne area) markets have been open to competition to domestic customers since 2007. However, there were no competing suppliers in the domestic market until 2010.

The 10 towns gas area opened to competition for large I&C customers (those consuming over 732,000 kWh per annum) in October 2012. The domestic and small I&C segments still remain supplied exclusively by one incumbent company, and they are due to open to competition in April 2015.

The table below details when competition effectively started in each of the energy market segments.

Electricity	
Domestic	June 10: SSE Airtricity ¹⁰ entered the domestic credit segment Oct 10: firmus started supplying Ulster Farmers' Union members May 11: Airtricity entered the domestic keypad segment June 11: Budget Energy entry Oct 11: Electric Ireland entered the domestic sector
Non-domestic	Industrial electricity customers become eligible to change supplier from 1999. From 2005, small and medium businesses became eligible too. Feb 12: VAYU enters the non-domestic market Apr 12: LCC enters the non-domestic market

Gas: Greater Belfast and Larne area ¹¹	
Domestic	Incumbent supplier since Sept 1996: SSE Airtricity ¹² July 10: firmus ¹³ entered this market segment

⁹ The Climate Change Levy (CCL) is a tax on electricity, gas and solid fuels delivered to non-domestic consumers. Its objective is to encourage businesses to reduce their energy consumption or use energy from renewable sources. The rate changes every year.

¹⁰ Called Airtricity until 31 January 2014.

¹¹ The Greater Belfast area, including Holywood, Bangor, Newtownards, Belfast, Newtownabbey, Carrickfergus, Lisburn and Larne

Non-domestic	Incumbent supplier since Sept 1996: SSE Airtricity Nov 06: energia entered the daily metered I&C market ¹⁴ Sep 08: firmus energy entered the I&C market Mar 09: VAYU entered the small I&C market May 13: Electric Ireland entered the daily metered I&C market
Gas: 10 towns¹⁵	
Domestic and non-domestic small users	Due to open to competition from Apr 2015
Large non-domestic Users	Open to competition from Oct 2012. Jan 13: SSE Airtricity entered this market

For further details on the retail energy market in NI, please visit:

http://www.uregni.gov.uk/publications/utility_regulators_annual_energy_retail_reports/

¹² Formerly Phoenix Supply Ltd (PSL). Change of Company Name to Airtricity Gas Supply (Northern Ireland) Limited effective from 28 June 2012 then subsequent change of company name to SSE Airtricity Gas Supply (Northern Ireland) Limited from 31 January 2014.

¹³ firmus energy (Supply) Limited

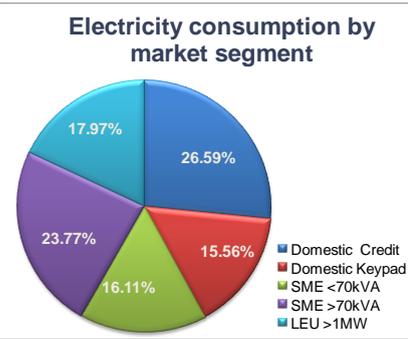

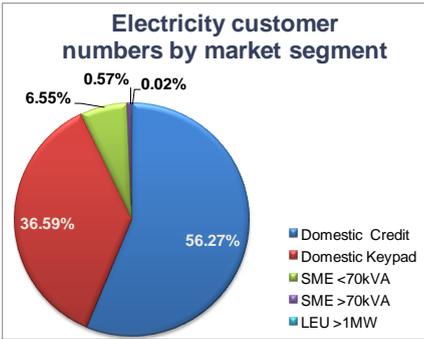

¹⁴ To note that energia did not have gas customers from October 2013.

¹⁵ In 2005 firmus energy was awarded a licence to develop the natural gas network in 10 towns across NI, from L'Derry to Ballymena, and from Antrim to Newry.

3 NI customer numbers and total consumption

3.1 Electricity

Year	2014	
Month	Q1	
Market segments	Customer Numbers	Consumption (GWh)
Domestic Credit	471,020	570.4
Domestic Keypad	313,037	336.1
SME <70kVA	55,344	359.4
SME >70kVA	4,830	507.1
LEU >1MW	181	387.8
Total	844,412	2,160.9

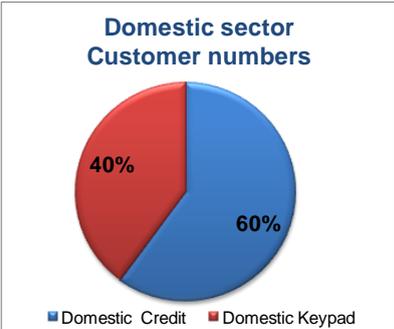

- From the total customers in NI, 93% belong to the domestic sector, while the remaining 7% are non-domestic customers. In this quarter, this translates into 42% and 58% respectively in terms of consumption.
- Within the non-domestic sector, more than 99% of the customers are small and medium enterprises, with 69% of the consumption. The remaining LEU customers consumed more than 30% in this quarter.
- Note that long term vacant sites are not included in customer numbers.

Payment split in the domestic sector

- The number of domestic credit customers continues to decrease in comparison to the number of prepayment customers.
- In this quarter, 40% of the electricity domestic customers were in the prepayment segment. In the same quarter last year, the percentage was 39%.
- Prepayment meters are a popular choice for customers in NI as customers can pay for energy as they consume it. The display unit also helps customers to manage usage and control their energy costs.

Year	2014	
Month	Q1	
Market segments	Customers numbers	
Domestic Credit	471,020	
Domestic Keypad	313,037	
Total domestic sector	784,057	

3.2 Gas – Greater Belfast and 10 towns areas

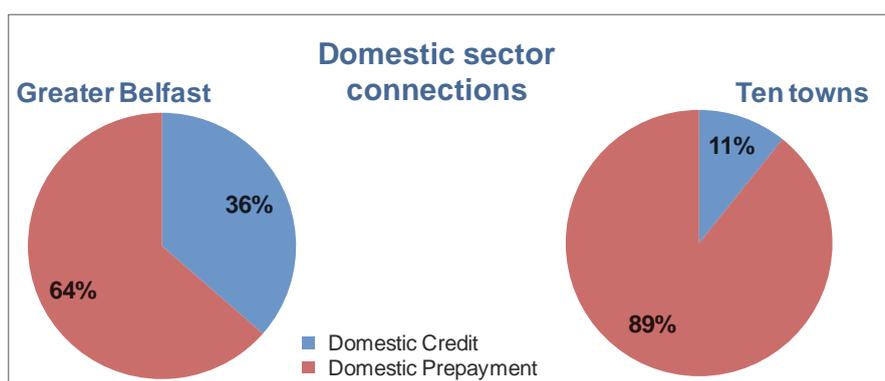

Year	2014	
End of quarter	Q1	
Market segments	Connections	Consumption (therms)
Greater Belfast	168,618	47,744,375
Domestic & Small I&C	165,429	25,638,464
I&C > 73,200 kWh	3,189	22,105,911
Ten towns	22,436	16,410,511
Domestic	20,273	2,064,395
I&C	2,163	14,346,116
Total	191,054	64,154,886

- In the Greater Belfast area, the market segments are split following the Distribution Code:
 - Domestic and Small I&C (<73,200 kWh, or <2,500 Therms/annum), which in this quarter represents 98% of the connections and 54% of the quarterly consumption.
 - Medium and Large I&C (>73,200 kWh, or >2,500 Therms/annum) in this quarter represents 2% of the connections in this area, and 46% of the quarterly consumption.

- In the 10 towns area, competition in the large I&C segment opened in October 2012.
- Total connections in 10 towns are currently more than 22,400. In this distribution Licensed Area, domestic premises represent 90% of the connections (and 13% of the quarterly consumption), while the I&C sector represents the remaining 10% of connections (and 87% of quarterly consumption).

Payment split in the domestic sector

Year	2014		
End of quarter	Q1		
	Greater Belfast	Ten towns	Total NI
Domestic Credit	58,238	2,174	60,412
Domestic Prepayment	101,544	18,099	119,643
Total NI	159,782	20,273	180,055

- Within the domestic sector, prepayment customers represent 64% of the Greater Belfast distribution Licensed Area, and 89% in the 10 Towns distribution Licensed Area.
- Prepayment meters are a popular choice for customers in NI as customers can pay for energy as they consume it. The display unit also helps customers to manage usage and control their energy costs.
- The figures and charts are based on suppliers' returns.

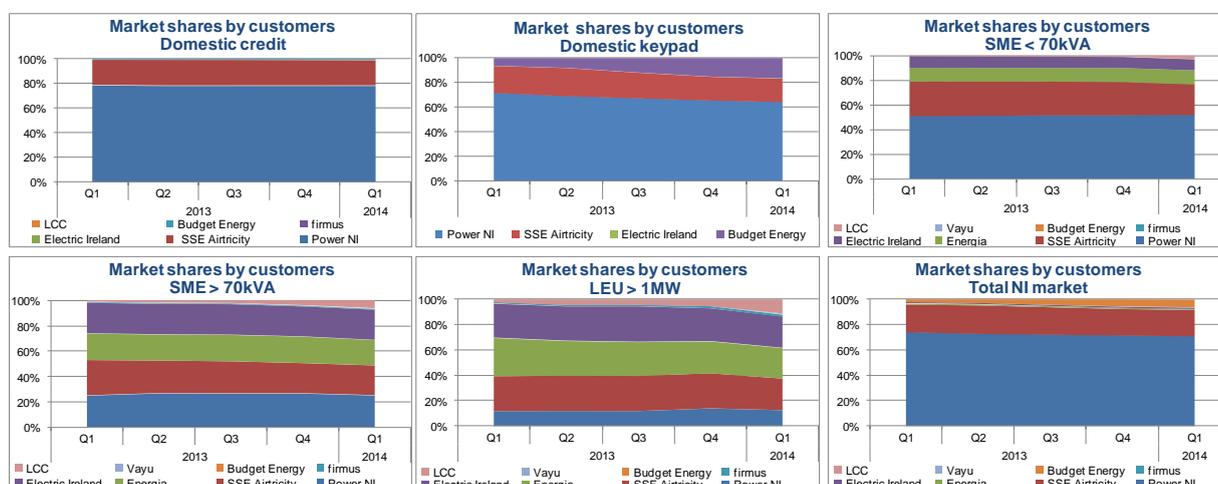

4 Market shares and market activity

4.1 Electricity shares

Electricity shares by customer numbers

Year	2014						
Month	Q1						
Suppliers	Domestic Credit	Domestic Keypad	SME <70kVA	SME >70kVA	LEU >1MW	Total	
Power NI	368,103	200,868	28,761	1,211	23	598,966	
SSE Airtricity	98,454	60,033	13,693	1,135	44	173,359	
Energia	0	0	6,192	979	44	7,215	
Electric Ireland	1,110	341	5,112	1,156	45	7,764	
firmus	246	0	18	31	3	298	
Budget Energy	3,049	51,795	144	4	0	54,992	
Vayu	0	0	2	9	1	12	
LCC	58	0	1,422	305	21	1,806	
Total Market	471,020	313,037	55,344	4,830	181	844,412	

Year	2014						
Month	Q1						
Suppliers	Domestic Credit	Domestic Keypad	SME <70kVA	SME >70kVA	LEU >1MW	Total	
% Power NI	78.2%	64.2%	52.0%	25.1%	12.7%	70.9%	
% Airtricity	20.9%	19.2%	24.7%	23.5%	24.3%	20.5%	
% Energia	0.0%	0.0%	11.2%	20.3%	24.3%	0.9%	
% Electric Ireland	0.2%	0.1%	9.2%	23.9%	24.9%	0.9%	
% firmus	0.1%	0.0%	0.0%	0.6%	1.7%	0.0%	
% Budget Energy	0.6%	16.5%	0.3%	0.1%	0.0%	6.5%	
% Vayu	0.0%	0.0%	0.0%	0.2%	0.6%	0.0%	
% LCC	0.0%	0.0%	2.6%	6.3%	11.6%	0.2%	

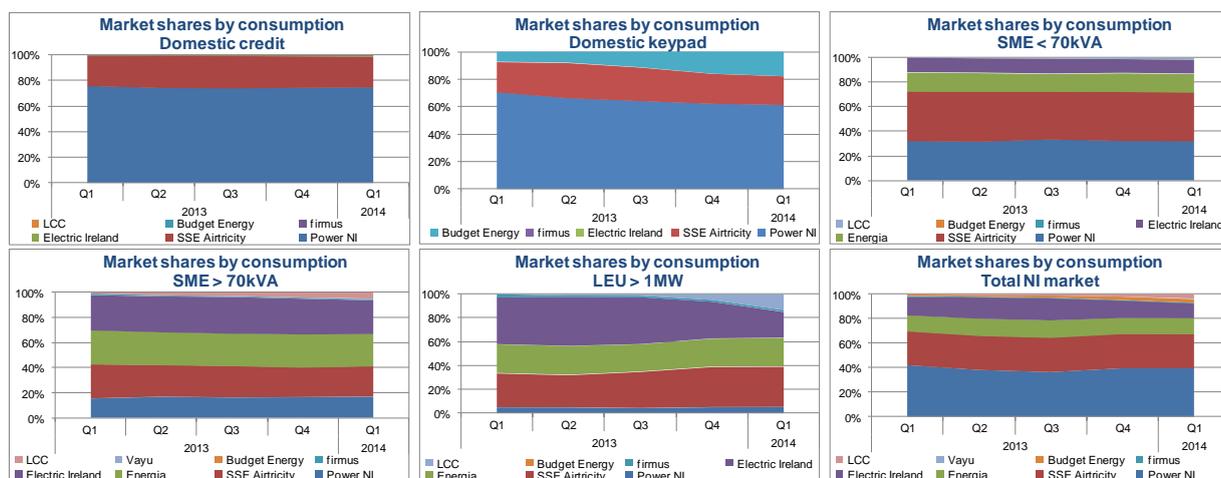

- The charts above show the trends in market shares (by customer numbers) for each active supplier in NI, by market segment from Q1 2013.
- The total number of domestic customers at the end of Q1 2014 was 784,057. There is still a large share of domestic customers remaining with the previously incumbent supplier. Although, this situation has been progressively changing over the last years, the percentage of domestic credit (including direct debit) customers supplied by Power NI has remained stable at 78% since Q2 2013. Power NI currently supplies 64% of keypad customers, which is a decrease from 65% from the previous quarter. The current non-incumbent share by customer numbers is 22% for credit domestic customers and 36% for keypad customers.
- Competition in the non-domestic market is more developed, and shares are more dispersed than in the domestic sector. There were eight active suppliers in Q1 2014. Based on customer numbers, four of these suppliers have shares in excess of c10% in each of the business segments. Within the I&C sector, LCC shares continue to grow, currently supplying 12% of LEU customers in this quarter.
- Source: NIE

Electricity shares by consumption (GWh)

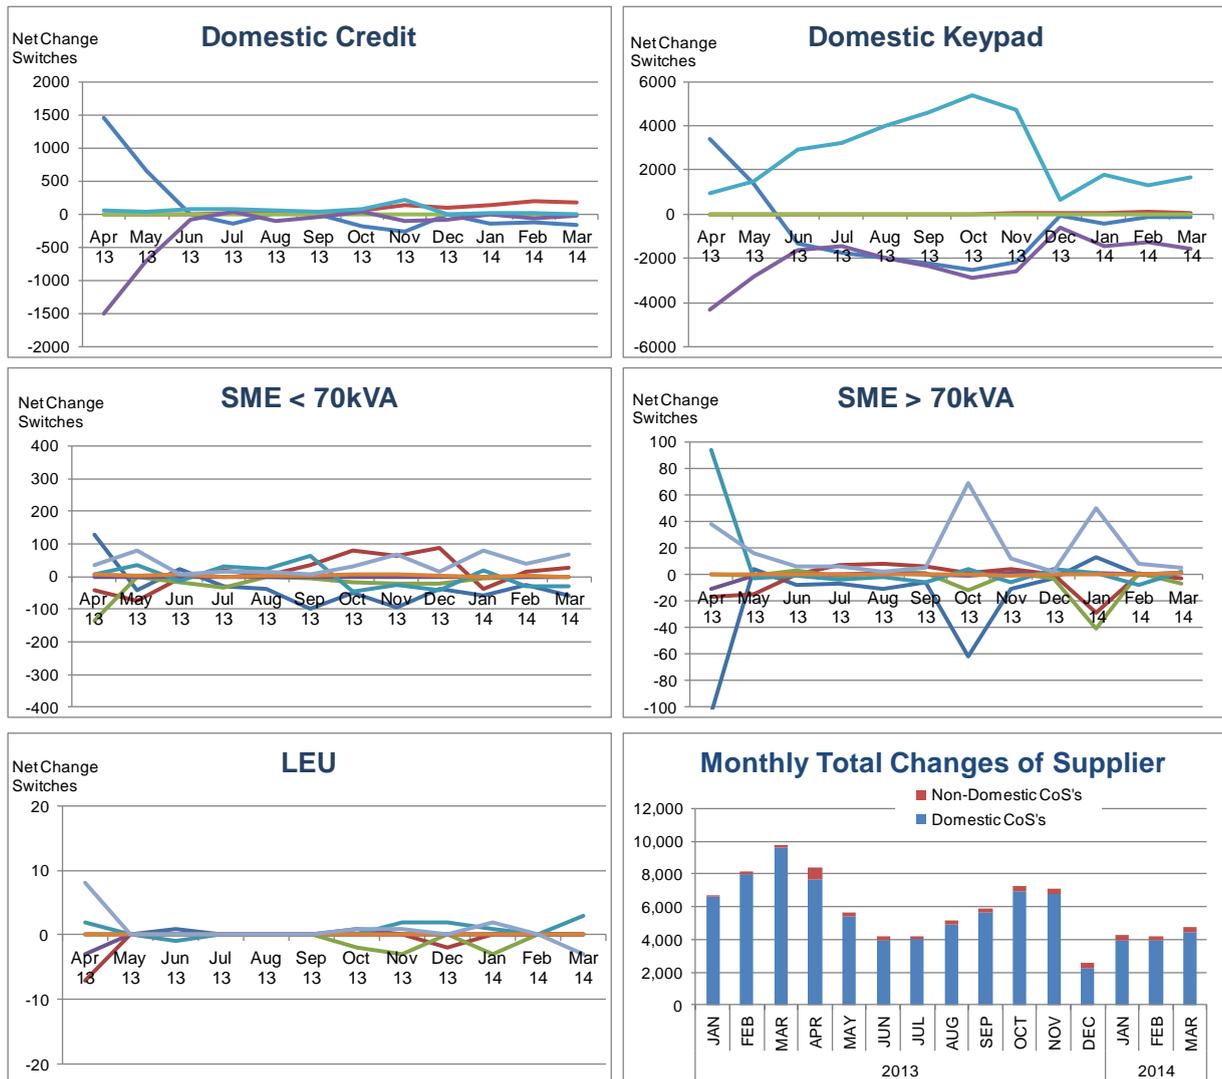

Year	2014					
Month	Q1					
Suppliers	Domestic Credit	Domestic Keypad	SME <70kVA	SME >70kVA	LEU >1MW	Total
Power NI	425.5	205.6	115.2	86.4	19.9	852.6
SSE Airtricity	136.2	71.3	142.1	123.2	132.3	605.2
Energia	0.0	0.0	54.4	130.3	93.4	278.1
Electric Ireland	1.1	0.3	40.7	135.7	83.3	261.1
firmus	3.1	0.0	0.3	4.4	5.8	13.6

Vayu	0.0	0.0	0.0	2.7	0.0	2.7
LCC	0.3	0.0	6.1	24.4	53.1	83.9
Consumption (GWh)	570.4	336.1	359.4	507.1	387.8	2,160.9

Year	2014					
Month	Q1					
Suppliers	Domestic Credit	Domestic Keypad	SME <70kVA	SME >70kVA	LEU >1MW	Total
% Power NI	74.6%	61.2%	32.0%	17.0%	5.1%	39.5%
% SSE Airtricity	23.9%	21.2%	39.5%	24.3%	34.1%	28.0%
% Energia	0.0%	0.0%	15.1%	25.7%	24.1%	12.9%
% Electric Ireland	0.2%	0.1%	11.3%	26.8%	21.5%	12.1%
% firmus	0.5%	0.0%	0.1%	0.9%	1.5%	0.6%
% Budget Energy	0.7%	17.5%	0.2%	0.0%	0.0%	2.9%
% Vayu	0.0%	0.0%	0.0%	0.5%	0.0%	0.1%
% LCC	0.0%	0.0%	1.7%	4.8%	13.7%	3.9%

- The charts above reflect the market share of each active supplier in NI by consumption (sales units in GWh).
- Power NI's share of the total NI electricity market by consumption remains at 39%, (as per last quarter). This supplier retains a large market share by consumption in the domestic market (credit and keypad) of around 70%.
- In the non-domestic market, the main suppliers are SSE Airtricity (32%), energia (22%) and Electric Ireland (21%). In this sector, Power NI has a share of 18%.
- The non-incumbent suppliers have currently 61% of the total NI electricity market by consumption. This percentage is mainly split between SSE Airtricity with 28%, energia with 13%, and Electric Ireland with 12%.
- Source: NIF

4.2. Electricity market activity

- The first five charts above reflect the net change of customer numbers (customer gains less losses), per market segment and anonymised supplier.
- The bar graph shows the market activity through changes of supplier (CoS) on a monthly basis in the whole market in NI, split by domestic and non-domestic markets.
- The number of domestic switches over this quarter has remained around 4,000 switches per month. Overall, the quarterly switching figures are lower than in the previous quarter. Non-domestic switches show a similar movement. The average for non-domestic switches was around 300 switches per month.

	% Domestic switching	% Non-Domestic	% Total switching
2013			
Q1	3.1%	0.8%	2.9%
Q2	2.2%	2.0%	2.2%
Q3	1.9%	1.1%	1.8%
Q4	2.0%	1.6%	2.0%
2014			
Q1	1.6%	1.5%	1.6%

- The table opposite shows % rates of quarterly switching. These percentages are calculated using the number of actual quarterly switches over the number of actual customers at the end of the quarter in the relevant market. Following the CoS movements above, the table shows a decrease in the number of switches from Q4 2013 in both sectors.

4.3. Gas – Greater Belfast area: shares

Shares by connections

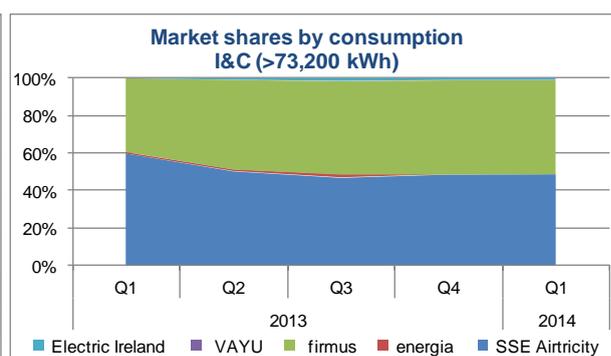

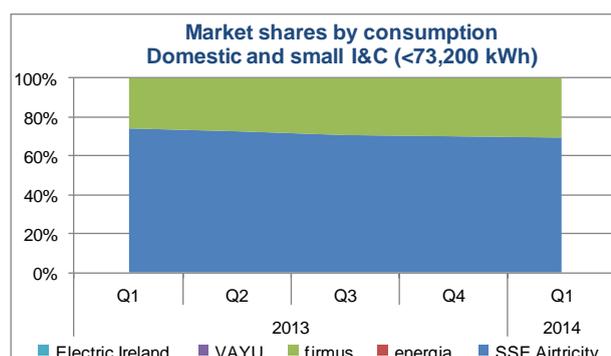

Year	2014						
End of quarter	Q1						
Suppliers	Domestic & Small I&C	I&C > 73,200 kWh	Total				
SSE Airtricity	118,829	1,637	120,466	% Connections SSE Airtricity	71.83%	51.33%	71.44%

Electric Ireland	0	245,090	245,090	% Consumption Elec. Ireland	0.00%	1.11%	0.51%

- The information above, on connections and consumption, relates to the Phoenix Natural Gas Ltd distribution Licensed Area.
- Market shares shown in terms of connections are as at end-March 2014.
- Market shares shown in terms of consumption relate to consumption during Q1 2014.
- There were three active suppliers in the domestic and small I&C (<73,200 kWh) gas market during this quarter – only two of them were active in the domestic market. There were four active suppliers in the medium and large I&C segment (>73,200 kWh) during Q1 2014.
- At the end of this quarter, SSE Airtricity's share by connections in the total gas market had decreased to 71% (from 72% in the previous quarter), while their share by consumption remains around 60%. Correspondingly, firmus' share in this area has increased to 29% (in terms of connections).
- Source: Phoenix Natural Gas.

4.4. Gas – Greater Belfast area: market activity

- The information below relates to the Phoenix Natural Gas Ltd Distribution Licensed Area.
- Switching activity shown reflects completed switches.
- The table below shows the switching rate for the domestic and non-domestic markets in Greater Belfast area. These percentages are calculated using the number of Supply Meter Point switches during the quarter as a percentage of the total number of Supply Meter Points in the market segment at the end of the quarter.

- Within the domestic sector, and similarly to the market activity in the electricity sector, there has been a decrease in the number of switches in this quarter.
- The switching activity in the non-domestic sector has decreased slightly compared to the previous quarter. The switching rate has therefore decreased very slightly, from 0.38% to 0.36% (both shown in the table as 0.4%).
- Source: Phoenix Natural Gas and gas suppliers.

	% Domestic	% Non-Domestic switching	% Total switching
2013			
Q1	2.6%	3.4%	2.7%
Q2	2.6%	0.6%	2.5%
Q3	2.2%	0.5%	2.1%
Q4	1.7%	0.4%	1.6%
2014			
Q1	1.5%	0.4%	1.4%

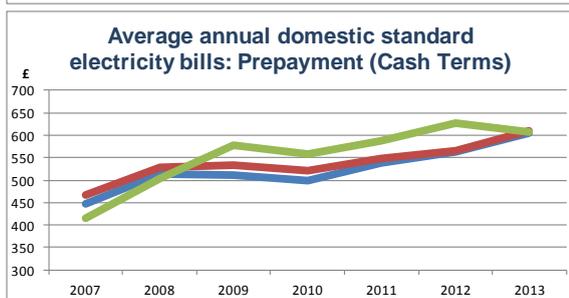

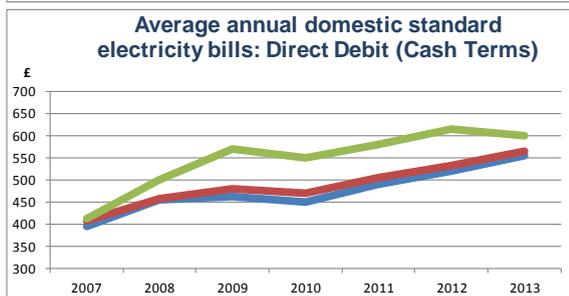

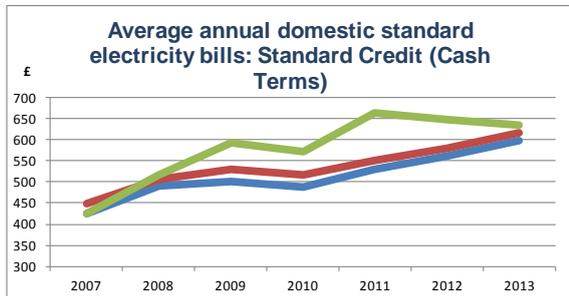

4.5. Gas – 10 towns area: shares and market activity

- Competition opened in the 10 towns large I&C market (>732,000 kWh) in October 2012.
- SSE Airtricity entered the large I&C market in January 2013, and as at end March 2014, 29 supply meter points had switched from firmus to SSE Airtricity. This equates to 12% market share of the large I&C market (consumption over 732,000 kWh, or over 25,000 therms) in terms of connections at the end of this quarter, and 10% market share in terms of consumption during Q1 2014 in the same market segment.
- The remainder of the market (i.e. small I&C and domestic market) will open to competition from April 2015.

5 Domestic prices

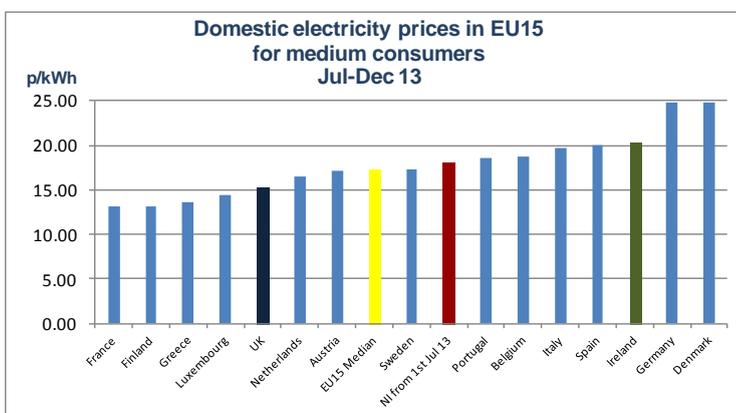

5.1 Electricity domestic prices

- Average domestic bills are calculated assuming an annual consumption of 3,800 kWh (please note that average annual consumption has increased from 3,300 kWh on these charts due to recent changes made by DECC). Data is inclusive of VAT.
- These bills relate to the total amount charged during the year, rather than a bill based on the latest prices.
- Historically in NI, electricity prices have been higher than in GB. This is mainly because there are higher energy transport costs, small size of the market that reduces chances of economies of scale, difference in fuel mix, etc.
- The prepayment option in NI is cheaper than the standard credit tariff, and vice versa for the other two regions. In 2013, the prepayment option in NI was slightly cheaper than in Scotland.
- Source: Table 2.2.2 on DECC last Quarterly Energy Prices (<https://www.gov.uk/government/organisations/department-of-energy-climate-change/series/quarterly-energy-prices>).

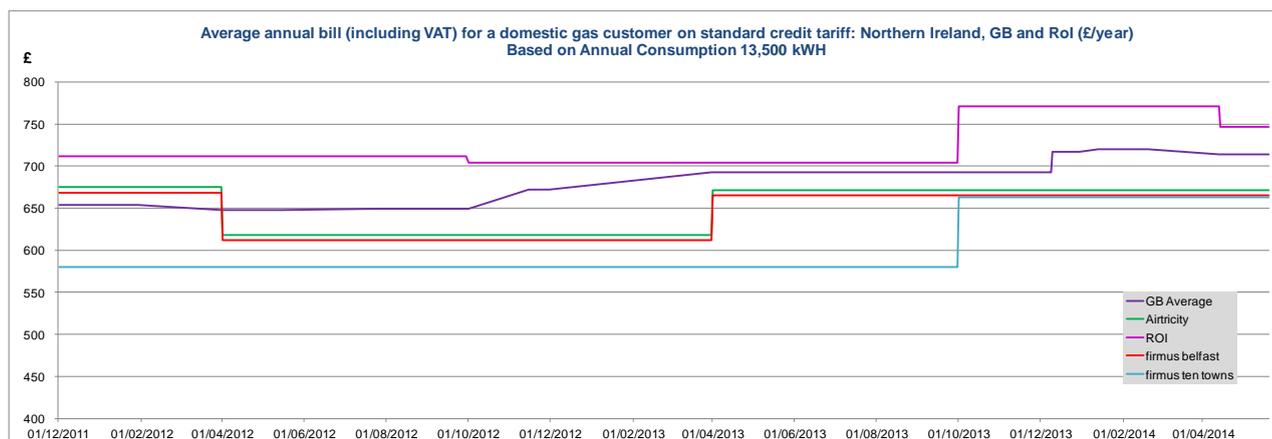

— England & Wales — Scotland — Northern Ireland

- The graph below compares NI domestic price with the most recent available prices for other countries in Europe (including taxes).
- For a domestic customer, including taxes, the NI regulated tariff over July - December 2013 was 18.04 p/kWh.

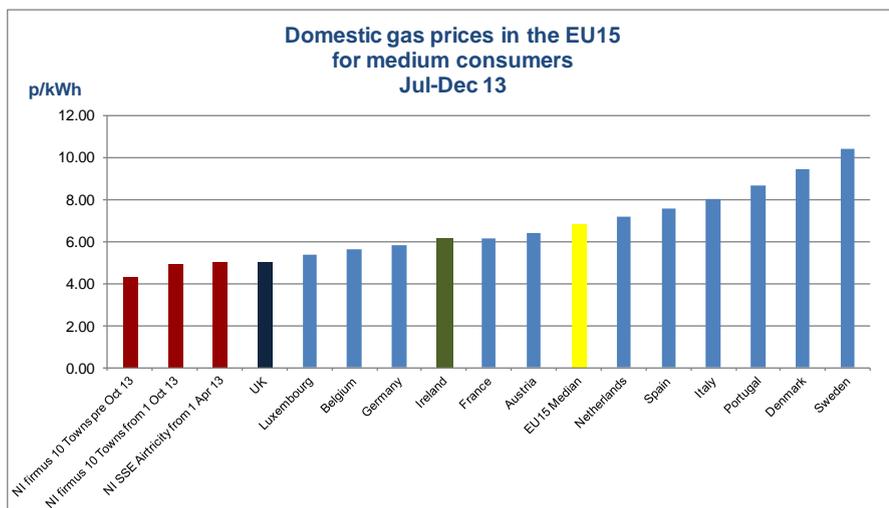

- Source: DECC Quarterly Energy Prices. Table 5.6.2. Medium consumers (2,500-4,999 kWh) including taxes.

5.2 Gas domestic prices

- The graph above compares gas domestic prices for standard gas tariffs. It shows a GB average which includes the six big suppliers. The annual usage estimate is 13,500 kWh.
- The tariffs used for comparison purposes are the standard tariff rates for domestic credit customers excluding any discounts available for payment by direct debit, viewing bills online, etc.
- Rol tariffs have increased by 1.47% from 14 April 2014, although it looks like a decrease on the graph. This is due to the changes in the exchange rate as the Rol tariff is converted into pound sterling for comparison purposes using the exchange rate applicable at the date of each tariff change.
- Source: UR internal data.

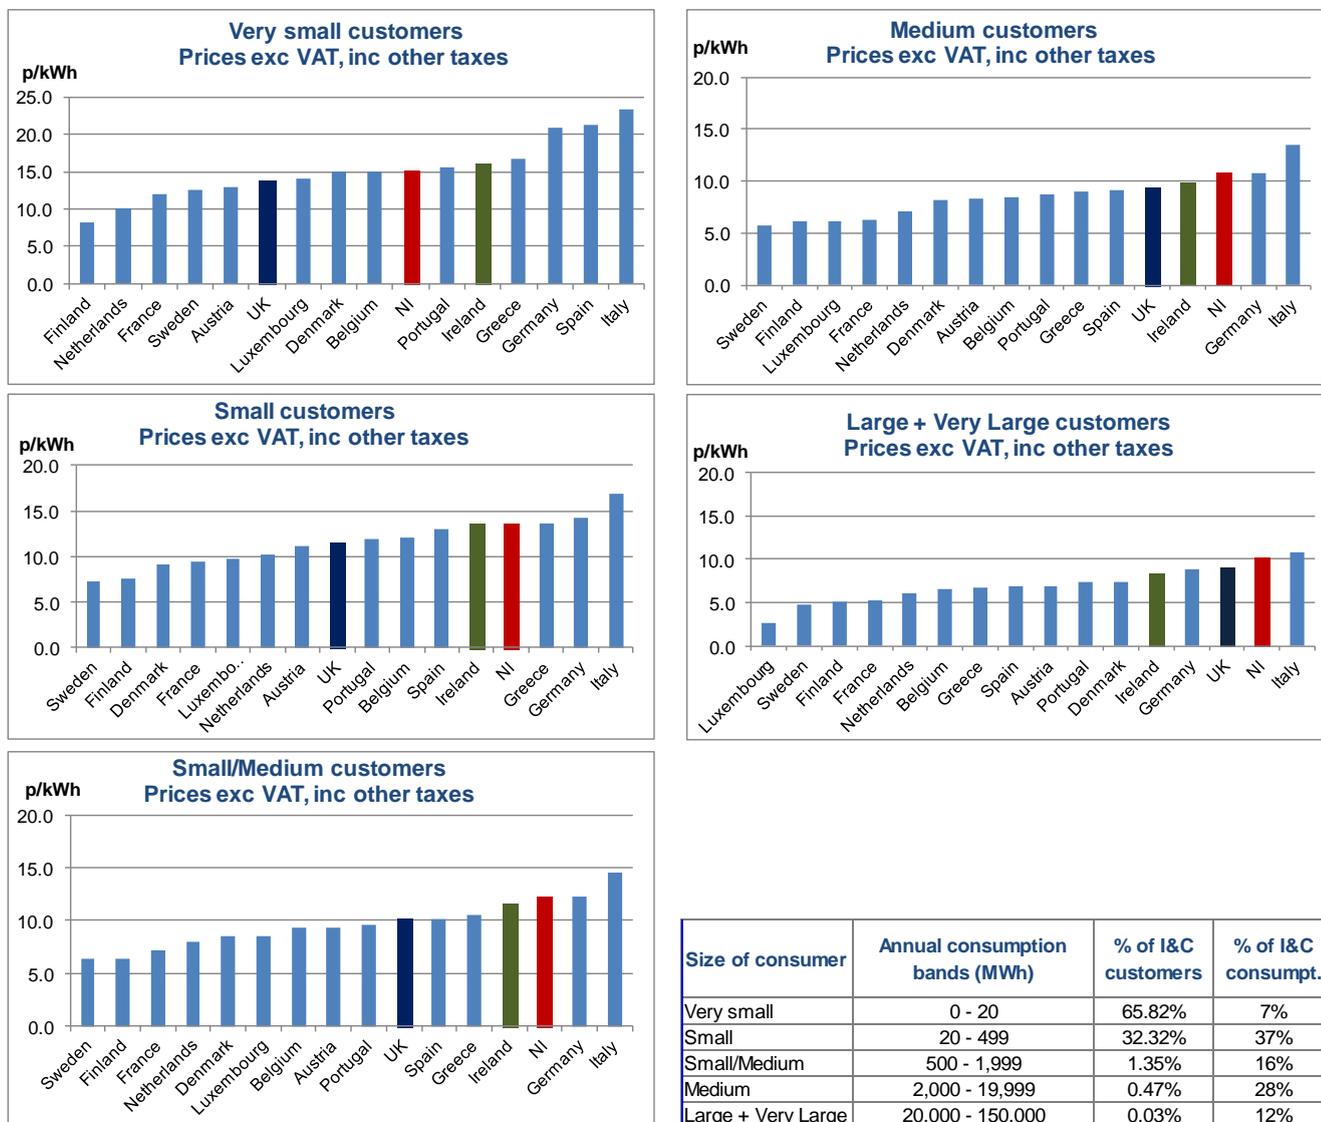

- The graph compares NI domestic gas price with the prices for other countries in Europe including taxes for the period July to December 2013.

- The NI price used is based on the SSE Airtricity credit tariff applying from April 2013, for a customer on a standard tariff consuming 13,500 kWh per annum (6.957p/kWh for first 2000 kWh, then 4.629p/kWh). It also shows the credit tariffs for 10 Towns customers, as follows:
 - Until 30 Sep 2013: 5.948p/kWh for the first 2000 kWh, and then 4.009 p/kWh
 - From 1 Oct 2014: 6.804 p/kWh for first 2000 kWh, and then 4.586 p/kWh

6 Electricity non-domestic prices

6.1. Price comparison with EU

Jul-Dec 2013

Source: NI electricity suppliers, Eurostat and UR internal calculations

- The graphs above show non-domestic electricity prices in the 15 EU countries, in comparison with NI prices, per consumption size bands (following EU categorisation).
- Prices for the very small customers are around the middle of the EU range. However, prices for larger non-domestic customers sit towards the top end of the EU comparisons.
- The table above shows percentages of NI non-domestic customers at the end of Q4 2013, and the consumption over Jul-Dec 2013 in each of those consumption categories.
- NI non-domestic customers are very heavily grouped in the smallest size band (consuming less than 20 MWh per annum). These customers account for 66% of the total customers in the I&C sector, while they represent approximately 7% of the I&C consumption.
