For the avoidance of doubt this does not include exceptional items, tax, fines, penalties or the gain or loss on the disposal of assets or investments (of any sort), i.e. it should be the net operating costs level.

Further, the Related Party Margin does not include any transparently calculated element of such a charge that provides for a reasonable allowance for depreciation and return on capital in relation to assets to the extent that these are employed by the Related Party in the provision of services to the Licensee, and is not otherwise reflected in the Licensee’s Maximum Regulated PSO Amount, or recoverable through the Licensee’s connection charges.

For Captive Insurance businesses the margin is to be computed based on the captive’s premium income less reinsurance premiums, claims paid out and movements on technical and IBNR reserves attributable to the Licensee’s business only, i.e. usually reported as the profits/loss on the Technical

account. Where a captive insures more than the Licensee, then its profit/loss should be computed pro rata to the premiums paid by the Licensee to total premium income in the captive for the year and the movements on technical and IBNR reserves not attributable to the Licensee's business must first be removed.

“Unit”

means a kilowatt hour.

“Wheeled Unit”

means a unit (whether generated inside or outside Northern Ireland) which enters the total system at any point and is delivered to a place outside

Northern Ireland.

- a) in Regulatory Reporting Year $t = 2013$:

$$K_t = K_{\text{opening}}$$

Where:

K_{opening} means the closing K factor at 31st March 2012 and has the value of £4.466 million.
