

SONI LTD

STATEMENT OF CHARGES FOR

1. USE OF

THE NORTHERN IRELAND ELECTRICITY plc

ELECTRICITY TRANSMISSION

SYSTEM

and

2. SYSTEM SUPPORT SERVICES

**BY
AUTHORISED PERSONS**

Nov 2007

**Effective from
1 Nov 2007**

SONI LTD

STATEMENT OF CHARGES FOR USE OF NORTHERN IRELAND ELECTRICITY plc ELECTRICITY TRANSMISSION SYSTEM NOVEMBER 2007 TO SEPTEMBER 2008 INCLUSIVE

INTRODUCTION

This statement describes the charges for use of the Northern Ireland Electricity plc (NIE) transmission system for the purposes of transporting electricity to customers and generators, or exporting electricity on to the transmission system. A separate statement describes the charges for connection to the transmission system.

This statement has been prepared by SONI in accordance with the **[System Operator Licence]** and has been approved by NIAUR. Words and expressions used in this statement shall, unless specifically defined herein, have the definitions given to them in the **[Electricity (Northern Ireland) Order 1992 (the Order), and the Licence]**, and shall be construed accordingly. Charges and costs shown are current at the time of publication but are subject to change without notice following revision of the statement and its approval by NIAUR. However, SONI and a user may agree changes separately.

The charges in this statement have the same structure as those in the April 2007 Statement of Charges for Use of the NIE Electricity transmission and distribution system. This is the first Statement of Charges issued by SONI under the new system operator licence.

SONI is reviewing the methodology used for the development of transmission use of system charges for generator export, and will publish revised charges to take effect from January 2008, subject to approval by NIAUR.

Persons seeking to use the transmission system will be required, prior to using the transmission system, to enter into a Transmission Use of System Agreement with SONI setting out the obligations of both parties. The Transmission Use of System Agreements and/or Connection Agreements for suppliers, generators and customers will require the connected party to comply with the provisions of the NI Grid Code, obtainable from SONI's website (www.soni.ltd.uk). SONI will offer terms for transmission use of system as soon as practicable after receipt of an application and in any case not later than 28 days after receipt of all relevant information. The Transmission Use of System Agreement will take precedence in the event of any inconsistency with this statement.

The party seeking use of the transmission system will be required to pay all charges due in respect of use of the transmission system as described in this statement and the accompanying schedules.

Where an authorised electricity operator having entered into a Transmission Use of System Agreement ceases for whatever reason to be an authorised electricity operator with respect to that use of the transmission system, then the entitlement to use of the transmission system will cease forthwith in accordance with the terms of the Transmission Use of System Agreement, except that the authorised electricity operator shall continue to pay to SONI all capacity related Transmission use of system charges payable under that agreement during the effective period of this statement.

Persons seeking transmission use of system or persons seeking a connection in conjunction with transmission use of system must apply to SONI in writing to the address given at the end of this statement.

Persons seeking transmission use of system with respect to a new supply must apply for connection in accordance with the terms and conditions described in the appropriate statement of connection charges. The appropriate Connection Agreement with each customer or generator will take precedence in the event of any inconsistency with this statement or the relevant statement of connection charges.

Where the person seeking transmission use of system is not satisfied with the terms offered, and agreement with SONI cannot be reached within a reasonable time, either party may request settlement by the Northern Ireland Authority for Utility Regulation, Queen's House, 14 Queen Street, Belfast BT1 6ED.

This statement is obtainable from SONI's website (www.soni.ltd.uk).

PRINCIPLES FOR CHARGING FOR USE OF THE TRANSMISSION SYSTEM

1. Where a supply of electricity is provided over electric lines or electrical plant comprising a part of the transmission system, a charge for use of the transmission system will be levied on the supplier. The relevant charges that are generally applicable are described in Schedule A of this statement and are payable by reference to the characteristics of the supply, in accordance with the categories of supply described in the schedule. These charges may then be passed through to customers or generators by the suppliers under the relevant agreements between such parties and may be incorporated into the charges payable to suppliers under such agreements. In respect of supplies to over 1 MW customers charges for use of the transmission system may be individually costed and may take account of the specific NIE assets employed in providing that supply.
2. Where a generator other than a generator whose capacity and output is contracted to the NIE Power Procurement Business (the PPB) under Power Procurement Agreements, and the PPB (to the extent of the capacity and output of the generating units contracted to it) is exporting

electricity over electric lines or electrical plant comprising a part of the transmission system, a charge for use of the transmission system will be levied on the generator and the PPB. The charges applicable are described in Schedule E of this statement.

3. Where a generator is importing electricity over electric lines or electrical plant comprising a part of the transmission system, a charge for use of the transmission system will be levied on the registered supplier. The charges applicable are described in Schedule E of this statement.
4. Where a generator, embedded in the distribution system and under contract to a supplier, exports electricity over the distribution system to exit points, a transmission rebate may be payable to the supplier to reflect the likelihood that the exported energy will be absorbed by the local distribution system and no use of the transmission system will be required. The credits applicable are described in Schedule D.
5. The charges for use of the transmission system reflect the costs of providing, operating and maintaining the transmission system to the standards prescribed by the [transmission system owner licence], other than those costs which are recovered through charges paid to SONI or NIE in respect of connection.
6. The charges for each category of supply depend upon the criteria which determine eligibility for that category as described in the attached schedules, such criteria to include the voltage of connection to the system, the power factor and other characteristics of the demand, and installation of the metering necessary to establish those characteristics. In respect of supplies to over 1 MW customers, the criteria will also include the location.
7. Charges to suppliers for use of the transmission system reflect real electrical flows on the system and the need to provide adequate capacity at all voltage levels to protect the security of the system.
8. In accordance with the attached schedules and depending on the criteria stated, the charges for use of the transmission system to suppliers may include some or all of the following elements:
 - A standing charge to cover the costs that do not vary with the extent to which the supply is taken up. This charge is designed to reflect the cost of basic metering, meter reading, billing and the cost of service cables and terminations not recoverable as part of the connection charge and maintenance of those aspects of the supply. The cost of the customer record, associated on-costs and other indirect costs are also included.

- An availability charge per kVA of supply capacity provided to cover capacity on the local network which is attributed to the supply.
 - A charge per kVA of supply demand recorded designed to reflect the seasonal costs not recovered in the unit charge below.
 - A charge per kWh for each unit delivered through the transmission system, designed to reflect costs of the transmission system that are not recovered through the connection charge, the costs of maintaining and reinforcing the transmission system where connection charges are not applicable and associated on-costs.
 - A charge per kVAh to cover costs associated with providing supplies at lower power factors.
9. Where special metering is required to be provided in association with a particular schedule of charges, or in circumstances where the terms of the supply necessitate such metering, or where such metering is provided on request by the user of the transmission system, the excess cost will be recovered as a separate charge. Provision will be made at the metering point for customers to read meters or alternatively for customers to communicate with the meters subject to their providing any necessary communication systems and computer software/hardware at their own expense.
10. In cases where a supply to a meter point, by virtue of its characteristics, may be eligible for more than one category of charges for use of the transmission system, and one of the categories has been selected, that supply will not normally be eligible within twelve calendar months of such selection to pay transmission use of system charges under an alternative category except with the agreement of SONI. In considering such a change SONI will recognise the need to keep the transmission and distribution charging categories aligned from November 2007 for each meter point, as well as any relevant change in circumstances, including changes to the terms of and charges for use of the transmission system.
11. Payment of charges for use of the transmission system will be payable in accordance with any Transmission Use of System Agreement in force or, if there is no Transmission Use of System Agreement or the Transmission Use of System Agreement does not specify payment terms, within 10 business days of the date of invoice. The invoice will provide charges summated for all meter points allocated to each TUoS category. SONI reserves the right to require appropriate security in respect of the charges estimated to arise depending on the circumstances and on the basis of the agreed payment terms.

12. Where a supply is to be provided wholly or partly over the transmission system to an exit point from the transmission system, the user must enter into an arrangement to ensure that power delivered onto the transmission system at all times matches power leaving the transmission system after taking due account of system electrical losses appropriate to the voltage at which the supply is delivered and to the source of the supply as shown in the attached Schedule of Loss Adjustment Factors (Schedule B). Users should refer to Schedule B to calculate the amount of electricity that must be provided under these special circumstances.
13. Where, after evaluation of the characteristics of the requested use of the transmission system, SONI accepts that none of the categories of charges in the attached schedules is appropriate, special arrangements will be offered.
14. Where use of the transmission system is sought at a standard of security different to that specified in the standards contained in the [transmission system owner licence], SONI may require special arrangements to be made with respect to that transmission use of system. The approval of NIAUR will be required for any such use of the transmission system.
15. The use of the transmission system to transport electricity under a Transmission Use of System Agreement is subject to the amount of electricity exported through or supplied through any connection point not exceeding, without the prior written consent of SONI, the relevant Maximum Export or Import Capacity as set out on the relevant Supplement relating to such connection point. The Transmission Use of System Agreement or a Connection Agreement may provide for this. In the event that the relevant Maximum Capacity is exceeded, SONI may give notice to the supplier, customer or generator as appropriate setting out details and requesting the supplier, customer or generator to remedy the situation within 28 days of receipt of the notice, failing which SONI reserves the right to de-energise until such time as the supplier, customer or generator is able to satisfy SONI that the relevant Maximum Capacity will not be exceeded when the connection is renewed or arrangements have been made for a modification. Where the relevant Maximum Capacity is exceeded, SONI may charge for all reasonable additional costs incurred.
16. Persons who have acquired capacity (Capacity Holders) on the Moyle interconnector have an obligation to make payments directly to Moyle Interconnector Limited (Moyle) in accordance with the terms of their respective Moyle Interconnector Capacity Agreements. Moyle's transmission licence and the direction issued under it permit Moyle to raise revenues from sales of capacity on the Moyle interconnector and to recover the balance of its revenue requirements from payments received from SONI under the Collection Agency Agreement into which SONI is

obliged by its licence to enter. Under this agreement SONI is obliged to set its transmission use of system charges to suppliers each year at a level which includes Moyle's forecast of the amount (the Collection Agency Income Requirement) which Moyle needs to receive under the Collection Agency Agreement in that year to fully cover its costs. SONI must account to Moyle for the amounts so recovered. Schedule G explains the basis on which the Collection Agency Income Requirement will be recovered via transmission use of system charges.

SCHEDULE A

CHARGES TO SUPPLIERS FOR USE OF THE NIE TRANSMISSION SYSTEM 1 November '07 – 30 September '08

All charges set out below are exclusive of VAT and NIE will add to such charges VAT at the relevant rate applicable thereto from time to time.

1. FOR SUPPLY TO DOMESTIC PREMISES

The following charges for use of the system apply in respect of supply of electricity for use exclusively for domestic purposes or in premises comprising flats and places of worship. They do not apply where part of the supply is used for the purposes of, or in connection with, any trade, business or profession.

1.1 Standard Rate

A Standing Charge per premises for each quarterly account period: £0.00p

and

Unit Charges for all units delivered in the same period £0.401p |

1.2 Economy 7 Rate (Preserved Tariff)

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges as follows:

* for all units delivered in the same period £0.484p |

but reduced to:-

* for all units delivered during 7 hours between 2300hrs and 0800hrs GMT £0.005p

1.4 Economy 7 Rate

A Standing Charge for each quarterly account period: £0.00

and

Unit Charges as follows

- * for all units delivered in the same period £0.484p |
- but reduced to:-
- * for all units delivered during 7 hours between 2300hrs and 0800hrs GMT £0.005p |
- * for all units delivered for storage heating for 7 hours in 24 hours plus 4 hours during the night for water heating with an additional one hour boost in the afternoon (see condition (e) page 25) £0.005p |

1.4A Economy 7 Automatic

A Standing Charge for each quarterly account period: £0.00p

and

Unit Charges as follows:

- * for each unit delivered in the same period £0.484p |
- but reduced to:-
- * for all units delivered during 7 hours between 0100hrs and 0800hrs GMT £0.005p |
- * for all units delivered for storage heating up to 9 hours charge, depending on the weather conditions plus 4 hours during the night for water heating with an additional one hour boost in the afternoon (see condition (e) page 25) £0.005p |

2. FOR SUPPLY FOR COMBINED RESIDENTIAL/FARMS OR SMALL BUSINESS PREMISES

The following charges for use of system apply to the delivery of electricity used exclusively for the above purposes where the maximum power required (excluding any part of the supply used for thermal storage purposes) does not exceed 70kVA.

2.1 Standard Rate)

A Standing Charge for each quarterly account period:-	£0.00p
and	
A Unit Charge for all units delivered in the same period	£0.401p

2.2 Economy 7 (Preserved Tariff)

A Standing Charge for each quarterly account period:-	£0.00p
and	
A Unit Charge for all units delivered in the same period	£0.484p
but reduced to:-	
* for all units delivered during 7 hours between 2300hrs and 0800hrs GMT	£0.005p

2.4 Economy 7 Rate

A Standing Charge for each quarterly account period:	£0.00p
and	
A Unit Charge for all units delivered in the same period	£0.484p
but reduced to:-	
* for all units delivered during the 7 hours between 2300hrs and 0800hrs GMT	£0.005p
* for all units delivered for storage heating for 7 hours in 24 hours plus 4 hours during the night for water heating with an additional 1 hour boost in the afternoon (see condition (e) page 25)	£0.005p

2.4A Economy 7 Automatic

A Standing Charge for each quarterly account period:- £0.00p

and

A Unit Charge for all units delivered in the same period £0.484p

but reduced to:-

* for all units delivered during 7 hours between 0100hrs and 0800hrs GMT £0.005p

* for all units delivered for storage heating up to 9 hours depending on weather conditions plus 4 hours during the night for water heating with an additional 1 hour boost in the afternoon to (see condition (e) page 25) £0.005p

3. FOR SUPPLY FOR COMMERCIAL, INDUSTRIAL AND MISCELLANEOUS PREMISES

The following charges for use of the system apply to the delivery of electricity used exclusively for the above purposes where the maximum power required does not exceed 70kVA. This includes hotels, clubs, schools, public buildings, shops, offices, surgeries, meeting halls, places of worship, cinemas, bakeries and processing and manufacturing plants.

3.1 Standard Rate

A Standing Charge for each quarterly account period: £0.00p

and

Unit Charges for all units delivered during the same period £0.349p

3.2 Economy 7 (Preserved Tariff)

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges for all units delivered in the same period £0.396p

but reduced to:

* for each unit supplied during 7 hours between
2300hrs and 0800hrs GMT £0.005p

3.3 Evening and Weekend Rate

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges as follows:

* for all units delivered between 0730hrs and 2000hrs GMT
Monday to Friday inclusive £0.564p

* for all units delivered between 2000hrs and 0730hrs GMT
Monday to Friday inclusive and during the whole of

Saturday and Sunday

£0.006p

3.4 Economy 7 Rate

A Standing Charge for each quarterly account period

£0.00p

and

Unit Charges for all units delivered in the same period

£0.396p

but reduced to:

* for all units delivered during 7 hours between 2300hrs
and 0800hrs GMT

£0.005p

* for all units delivered for storage heating for 7 hours in 24
hours plus 4 hours during the night for water heating with an
additional 1 hour boost in the afternoon
(see condition (e) page 25)

£0.005p

4. OFF-PEAK SUPPLIES (PRESERVED TARIFFS)

4.1 8 Hours Off-Peak Rate Commercial (Preserved Tariff)

Hours of availability 2300hrs to 0700hrs GMT daily.

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges for all units delivered in the same period £0.250p

4.2 11 Hours Off-Peak Rate Commercial (Preserved Tariff)

Hours of availability 2300hrs to 0700hrs GMT daily and up to 3 additional hours daily at the discretion of NIE.

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges for all units delivered in the same period £0.250p

4.3 15 Hours Off-Peak Rate Commercial (Preserved Tariff)

Hours of availability Monday - Friday 1930hrs to 0730hrs GMT and up to 3 hours daily at the discretion of NIE. Saturday and Sunday are unrestricted.

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges for all units delivered in the same period £0.250p

4.4 16 Hours Off-Peak Rate Commercial (Preserved Tariff)

Hours of availability Monday - Friday 1830hrs - 0730hrs
GMT and up to 3 hours daily at NIE discretion.
Saturday and Sunday are Unrestricted.

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges for all units delivered in the same period £0.250p

4.5 8 Hours Off-Peak Rate Domestic (Preserved Tariff)

Hours of availability 2300hrs to 0700hrs GMT daily.

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges for all units delivered in the same period £0.250p

4.6 11 Hours Off-Peak Rate Domestic (Preserved Tariff)

Hours of availability 2300hrs to 0700hrs GMT daily and up to
3 additional hours daily at the discretion of NIE.

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges for all units delivered in the same period £0.250p

4.7 15 Hours Off-Peak Rate Domestic (Preserved Tariff)

Hours of availability Monday - Friday 1930hrs to 0730hrs GMT and up to 3 hours daily at the discretion of NIE. Saturday and Sunday are unrestricted.

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges for all units delivered in the same period £0.250p

4.8 16 Hours Off-Peak Rate (Preserved Tariff) Domestic

Hours of availability Monday - Friday 1830hrs - 0730hrs GMT and up to 3 hours daily at NIE discretion. Saturday and Sunday are unrestricted.

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges for all units delivered in the same period £0.250p

5. FOR SUPPLY OF PREMISES WHERE A KEYPAD METER IS INSTALLED

The following charges for use of the system apply in respect of supply of electricity to premises where a prepayment keypad meter has been installed, and where the supply is for the use exclusively for domestic purposes or in premises comprising flats and places of worship. They do not apply where part of the supply is used for the purposes of, or in connection with, any trade, business or profession.

5.1 4 Rate Time-banded Keypad

A Standing Charge for each quarterly account period: £0.00p

and

Unit Charges as follows:

* for all units delivered between 16:00hrs to 1900hrs GMT
Monday to Friday inclusive £3.102p

* for all units delivered between 08:00hrs to 1600hrs GMT
Monday to Friday inclusive £0.010p

* for all units delivered between 1900hrs and 2400hrs GMT
Monday to Friday inclusive and 0800hrs to 1900hrs GMT
Saturday and Sunday £0.007p

* for all units delivered between 0000hrs and 0800hrs GMT
Monday to Friday inclusive and 1900hrs to 0800hrs GMT
Saturday and Sunday £0.006p

5.2 4 Rate Unrestricted Keypad

A Standing Charge for each quarterly account period: £0.00p

and

Unit Charges as follows:

* for all units delivered between 16:00hrs to 1900hrs GMT
Monday to Friday inclusive £0.401p

* for all units delivered between 08:00hrs to 1600hrs GMT
Monday to Friday inclusive £0.401p

* for all units delivered between 1900hrs and 2400hrs GMT
Monday to Friday inclusive and 0800hrs to 1900hrs GMT

Saturday and Sunday £0.401 p

* for all units delivered between 0000hrs and 0800hrs GMT
Monday to Friday inclusive and 1900hrs to 0800hrs GMT
Saturday and Sunday £0.401 p

5.3 Economy 7 Rate Keypad

A Standing Charge for each quarterly account period: £0.00p

and

Unit Charges as follows:

* for all units delivered between 08:00hrs to 1900hrs GMT
Monday to Friday inclusive £0.484p

* for all units delivered between 19:00hrs to 2400hrs GMT
Monday to Friday inclusive £0.484p

* for all units delivered between 0800hrs to 2400hrs GMT
Saturday and Sunday £0.484p

* For all units delivered during 8 hours between 0000hrs
and 0800hrs GMT £0.005p

5.4 Standard Rate Keypad

A Standing Charge per premises for each quarterly account period: £0.00p

and

Unit Charges for all units delivered in the same period £0.401 p

5.5 Economy 7 Rate Keypad

A Standing Charge for each quarterly account period: £0.00p

and

Unit Charges as follows:

* for all units delivered in the same period £0.484 p

but reduced to:-

* for all units delivered during 7 hours between 2300hrs and 0800hrs GMT £0.005p

* for all units delivered for storage heating for 7 hours in 24 hours plus 4 hours during the night for water heating with an additional one hour boost in the afternoon (see condition (e) page 25) £0.005p

5.5A Economy 7 Automatic Keypad

A Standing Charge for each quarterly account period: £0.00p

and

Unit Charges as follows:

* for each unit delivered in the same period £0.484p

but reduced to:-

* for all units delivered during 7 hours between 2300hrs and 0800hrs GMT £0.005p

* for all units delivered for storage heating up to 9 hours charge, depending on the weather conditions plus 4 hours during the night for water heating with an additional one hour boost in the afternoon (see condition (e) page 25) £0.005p

5.6 8 Hours Off-Peak Rate Keypad (Preserved Tariff)

Hours of availability 2300hrs to 0700hrs GMT daily.

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges for all units delivered in the same period £0.250p

5.7 11 Hours Off-Peak Rate Keypad (Preserved Tariff)

Hours of availability 2300hrs to 0700hrs GMT daily.

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges for all units delivered in the same period £0.250p

5.8 15 Hours Off-Peak Rate Keypad (Preserved Tariff)

Hours of availability 2300hrs to 0700hrs GMT daily.

A Standing Charge for each quarterly account period £0.00p

and

Unit Charges for all units delivered in the same period £0.250p

6. UNMETERED SUPPLIES

The following charges for use of system apply to the delivery of electricity used at unmetered connections to the system. Such connections will have been approved by NIE and will be charged for use of the transmission system on the basis of their deemed consumption profile. The management of the unmetered inventory and estimates of electricity consumption will be determined in accordance with the Retail Market Procedure NI 114.

6.1 Unmetered Supplies, Continuous Profile

Unit Charges for all units delivered in the period	£0.214p
--	---------

6.2 Unmetered Supplies, Dusk to Dawn Profile

Unit Charges for all units delivered in the period	£0.309p
--	---------

FOR NON DOMESTIC CUSTOMERS (EXCLUDING THOSE REFERRED TO ABOVE) WHERE SUPPLIES ARE LESS THAN 70KVA AND TAKEN AT MEDIUM VOLTAGE (LESS THAN 1000 VOLTS)

Standing Charge for each monthly account period	£0.00p
Unit Charges Weekday Units and for on-line customers weekday units excluding Public Holidays and Christmas period (see Schedule E) for each kilowatt hour delivered between 0800 to 2030 hrs excluding 1600 – 19.00 hrs Monday – Friday inclusive November – February inclusive	
December and January	£0.012p
November and February	£0.012p
April – October inclusive and March	£0.009p
Peak Units and for on-line customers peak units excluding the Christmas period (see Schedule E) for each kilowatt hour delivered between 1600 – 1900 hrs Monday – Friday inclusive	
December and January	£9.735p
November and February	£5.586p
April – October inclusive and March	£0.009p
Evenings and Weekend Units and for on-line customers evening and weekend units including weekday units during Public Holidays and Christmas period (see Schedule E) for each kilowatt hour delivered between 0800 hrs and 2230 hrs at weekend and for each kilowatt hour delivered between 2030 hrs and 2230 hrs on weekday evenings, throughout the year	£0.006p
Night Units for each kilowatt hour delivered during the night Between 2230 hrs and 0800 hrs, throughout the year	£0.005p

Note.

All charging periods refer to Greenwich Mean Time (GMT)

This Tariff requires metering data transferred automatically to NIE central data collection facility using a communication channel.

**FOR INDUSTRIAL, COMMERCIAL AND MISCELLANEOUS PREMISES
WHERE SUPPLIES ARE GREATER THAN 70 KVA AND TAKEN AT MEDIUM
VOLTAGE (LESS THAN 1000 VOLTS)**

	Over 1MW Customer		Under 1MW Customer
Circuit distance from Source Substation to System Connection Point	0.0 - 0.01 km	Over 0.01 km	
Standing Charge for each monthly account period	£0.00p	£0.00p	£0.00 p
Availability Charge a monthly charge for each kVA of chargeable service capacity recorded between 0800 hrs and 2230 hrs subject to 50 kVA minimum	£0.00p	£0.00p	£0.00 p
Unit Charges Weekday Units and for on-line customers weekday units excluding Public Holidays and Christmas period (see Schedule E) for each kilowatt hour delivered between 0800 to 2030 hrs excluding 1600 - 19.00 hrs Monday – Friday inclusive November – February inclusive			
December and January	£0.012p	£0.012p	£0.012 p
November and February	£0.012p	£0.012p	£0.012 p
April – October inclusive and March	£0.009p	£0.009p	£0.009 p
Peak Units and for on-line customers peak units excluding the Christmas period (see Schedule E) for each kilowatt hour delivered between 1600 – 1900 hrs Monday – Friday inclusive			
December and January	£8.451p	£7.954p	£8.217 p
November and February	£6.754p	£7.054p	£7.019 p
April – October inclusive and March	£0.009p	£0.009p	£0.009 p
Evenings and Weekend Units and for on-line customers evening and weekend units including weekday units during Public Holidays and Christmas period (see Schedule E) for each kilowatt hour delivered between 0800 hrs and 2230 hrs at weekend and for each kilowatt hour delivered between 2030 hrs and 2230 hrs on weekday evenings, throughout the year	£0.006p	£0.006p	£0.006 p
Night Units for each kilowatt hour delivered during the night between 2230 hrs and 0800 hrs, throughout the year	£0.005p	£0.005p	£0.005 p
Reactive Power Charge For each kVAh in excess of 50% of the kWh delivered in the period 1600 - 1900 hrs Monday - Friday during the period November - February and for on-line customers excluding the Christmas period (see Schedule E)	£0.000p	£0.000p	£0.000 p

Note. All charging periods refer to Greenwich Mean Time (GMT)

**FOR INDUSTRIAL, COMMERCIAL AND MISCELLANEOUS PREMISES
WHERE SUPPLIES ARE TAKEN AT 6,600/11,000 VOLTS**

	Over 1MW Customer		Under 1MW Customer
Circuit distance from Source Substation to System Connection Point	0.0 - 0.15 km	Over 0.15 km	
Standing Charge for each monthly account period	£0.00	£0.00	£0.00
Availability Charge a monthly charge for each kVA of chargeable service capacity recorded between 0800 hrs and 2230 hrs subject to 100 kVA minimum	£0.00	£0.00	£0.00
Unit Charges Weekday Units and for on-line customers weekday units excluding Public Holidays and Christmas period (see Schedule E) for each kilowatt hour delivered between 0800 to 2030 hrs excluding 1600 - 19.00 hrs Monday – Friday inclusive November – February inclusive			
December and January	£0.012p	£0.012 p	£0.012p
November and February	£0.011p	£0.011 p	£0.011p
April – October inclusive and March	£0.008p	£0.008 p	£0.008p
Peak Units and for on-line customers peak units excluding the Christmas period (see Schedule E) for each kilowatt hour delivered between 1600 – 1900 hrs Monday – Friday inclusive			
December and January	£7.624p	£8.167 p	£7.989p
November and February	£6.517p	£6.619 p	£6.439p
April – October inclusive and March	£0.008p	£0.008 p	£0.008p
Evenings and Weekend Units and for on-line customers evening and weekend units including weekday units during Public Holidays and Christmas period (see Schedule E) for each kilowatt hour delivered between 0800 hrs and 2230 hrs at weekend and for each kilowatt hour delivered between 2030 hrs and 2230 hrs on weekday evenings, throughout the year	£0.006p	£0.006 p	£0.006p
Night Units for each kilowatt hour delivered during the night between 2230 hrs and 0800 hrs, throughout the year	£0.005p	£0.005 p	£0.005p
Reactive Power Charge For each kVAh in excess of 50% of the kWh delivered in the period 1600 - 1900 hrs Monday - Friday during the period November - February and for on-line customers excluding the Christmas period (see Schedule E)	£0.000p	£0.000 p	£0.000p

Note. All charging periods refer to Greenwich Mean Time (GMT)

FOR INDUSTRIAL, COMMERCIAL AND MISCELLANEOUS PREMISES
WHERE SUPPLIES ARE TAKEN AT 33,000 VOLTS

	Over 1MW Customer		Under 1MW Customer
Circuit distance from Source Substation to System Connection Point	0.0 - 0.25 Km	Over 0.25 km	
Standing Charge for each monthly account period	£0.00	£0.00	£0.00
Availability Charge a monthly charge for each kVA of chargeable service capacity recorded between 0800 hrs and 2230 hrs subject to 100 kVA minimum	£0.00	£0.00	£0.00
Unit Charges Weekday Units and for on-line customers weekday units excluding Public Holidays and Christmas period (see Schedule E) for each kilowatt hour delivered between 0800 to 2030 hrs excluding 1600 - 19.00 hrs Monday – Friday inclusive November – February inclusive			
December and January	£0.710p	£0.802p	£0.802p
November and February	£0.342p	£0.388p	£0.388p
April – October inclusive and March	£0.009p	£0.045p	£0.045p
Peak Units and for on-line customers peak units excluding the Christmas period (see Schedule E) for each kilowatt hour delivered between 1600 – 1900 hrs Monday – Friday inclusive			
December and January	£5.152p	£4.219p	£4.219p
November and February	£4.687p	£3.717p	£3.717p
April – October inclusive and March	£0.009p	£0.045p	£0.045p
Evenings and Weekend Units and for on-line customers evening and weekend units including weekday units during Public Holidays and Christmas period (see Schedule E) for each kilowatt hour delivered between 0800 hrs and 2230 hrs at weekend and for each kilowatt hour delivered between 2030 hrs and 2230 hrs on weekday evenings, throughout the year	£0.007p	£0.043p	£0.043p
Night Units for each kilowatt hour delivered during the night between 2230 hrs and 0800 hrs, throughout the year	£0.003p	£0.014p	£0.014p
Reactive Power Charge For each kVArh in excess of 50% of the kWh delivered in the period 1600 - 1900 hrs Monday - Friday during the period			

November - February and for on-line customers excluding the Christmas period (see Schedule E)	£0.000p	£0.000p	£0.000p
---	---------	---------	---------

Note. All charging periods refer to Greenwich Mean Time (GMT)

Transmission Use of System Charges for Generator Electricity Imports

The following charges for use of system will apply in respect to the system capacity provided to meet the maximum power required to be supplied to each power station connection and the extent to which that supply is taken up. These charges will apply to all imports with the exception of reactive imports requested by NIE to provide network support.

TUOS Charges for Imports Required at Transmission Voltages	
Standing Charge for each monthly account period	£1,746.62
Unit Charges Weekday Units and for on-line customers weekday units excluding Public Holidays and Christmas period (see Schedule E) for each kilowatt hour delivered between 0800 to 2030 hrs excluding 1600 – 19.00 hrs Monday – Friday inclusive November – February inclusive	
December and January	£0.012p
November and February	£0.011p
April – October inclusive and March	£0.008p
Peak Units and for on-line customers peak units excluding the Christmas period (see Schedule E) for each kilowatt hour delivered between 1600 – 1900 hrs Monday – Friday inclusive	
December and January	£8.692p
November and February	£5.020p
April – October inclusive and March	£0.008p
Evenings and Weekend Units and for on-line customers evening and weekend units including weekday units during Public Holidays and Christmas period (see Schedule E) for each kilowatt hour delivered between 0800 hrs and 2230 hrs at weekend and for each kilowatt hour delivered between 2030 hrs and 2230 hrs on weekday evenings, throughout the year	£0.006p
Night Units for each kilowatt hour delivered during the night Between 2230 hrs and 0800 hrs, throughout the year	£0.005p

Note.

All charging periods refer to Greenwich Mean Time (GMT)

This Tariff requires metering data transferred automatically to NIE central data collection facility using a communication channel.

General Definitions associated with Transmission Use of System Charges

Maximum Demand

The maximum demand in kilovolt amperes (kVA) at any point of supply in any month shall be deemed to be twice the greatest number of kilovolt ampere hours delivered in any half hour in that month. Where the supply to the premises is metered at more than one point the maximum demand in any month shall be deemed to be the arithmetical sum of the maximum demands at each of these points in that month.

Reactive Power Charge

Where the supply to the premises is metered at more than one point the reactive power charge shall be calculated separately at each of those points.

Month

For the purpose of the unit charges the months stated will either be a period of approximately one month between one normal meter reading and the next or will be the whole actual calendar month as specified from time to time by SONI. However for the purposes of the reactive charge and the demand charges the month stated will be the period of approximately one month between one normal meter reading and the next.

Quarter

For the purpose of unit charges the quarter means a period of approximately 3 months between one normal meter reading and the next.

Chargeable Service Capacity

Chargeable Service Capacity in the above rates means the capacity in kVA made available at the supply terminals for the supply afforded under those rates.

System Connection Point

The point at which the NIE connection assets are connected to the transmission or distribution system. The NIE connection assets will include all elements the full cost of which is covered by Connection Charges or grants.

Over 1MW Customer

An over 1MW Customer is a customer whose maximum monthly demand in the 3 months of the highest maximum demand on the system in each period of 12 consecutive months exceeds 1MW.

On-Line Customer

A customer of a supplier whose metering data is transferable automatically to a central data collection facility using a communication channel.

General Conditions associated with Transmission Use of System Charges to Suppliers

- (a) Subject to paragraph (c) any change in choice of transmission use of system tariff notified to SONI in writing will apply to electricity delivered after the next normal meter reading for the customer's premises or, where it is necessary to change metering equipment, from the date of the change.
- (b) If SONI has not been notified in writing of the choice of Tuos tariff or if the conditions applicable to the Tuos tariff chosen are not complied with or if that rate otherwise ceases to be applicable to the supply, SONI may charge at any Tuos tariff hereunder which is applicable and the supplier shall be liable to pay accordingly.
- (c) Unless the supplier is otherwise advised all times are Greenwich Mean Time and no alteration will be made for British Summer Time.
- (d) The 4 hours plus 1 hour boost for water heating is limited to a single 3kW heating element.
- (e) Preserved tariffs are only offered in respect of customers already on these tariffs.
- (f) Chargeable Service Capacity means the maximum power in kVA required by the customer or generator and will be established by determining whichever is the higher of:-
 - (i) The highest maximum demand recorded in kVA at the meter point in the current or previous financial year; or
 - (ii) a maximum demand figure in kVA formally agreed between the customer and NIE following the commencement of a new supply or where special conditions apply.

Where customers have not paid 100% of the relevant cost of connection condition (ii) may apply for five years after the initial connection of capacity or agreed increase in capacity.

System Support Service (SSS) Charges for the 11 Month Period November 2007 to September 2008

Proposed SSS Charges for 11 Months to September 2008

The following table sets out the charges that will be applied for each unit sold with rates applying for the various Use of System tariff categories for the period 1 November 2007 to 30 September 2008.

<u>Franchise Customers</u>	p/kWh sold
Domestic Standard	0.139
Domestic Economy 7	0.139
Off - Peak	0.139
Farm Standard	0.139
Farm Economy 7	0.139
Public Lighting	0.139
<u>Eligible Customers</u>	p/kWh sold
SME Standard	0.139
SME Economy 7	0.139
SME evening & weekend	0.139
MV under 1 MW	0.139
HV under 1 MW	0.139
Over 1 MW (except 33kV)	0.139
Over 1 MW (33kV)	0.139
