Dear Ronan,

Re: Response to Consultation on Modifications to NI Water's Instrument of Appointment

Thank you for your response of the 8th July 2011 to the recent consultation on modifications to Conditions B and F of NI Water's Instrument of Appointment.

You indicated in your consultation response that NI Water and its legal advisors considered that the UR had 'accepted points in relation to the more significant concerns' and that these had been reflected in the licence modification.

You also however stated your expectation to see points raised by others during the public consultation. It is our intention to publish all consultation responses on our website and are currently seeking permission from parties to do so, following which we will advise you of their publication and our response. In this context we would also request your agreement to publish your response and would be grateful for confirmation by the 28th July.

Please contact myself should you wish to discuss this letter in further detail.

Yours sincerely,

Jo Aston
Director of Water Regulation
