Abstract

This paper sets out the Utility Regulator’s (UR’s) proposed changes to the TSO licence held by SONI. The modifications are made to implement the Competition Markets Authority (CMA)’s Final Determination (FD) on the SONI TSO Price Control and to be made under Article 14 of the Electricity (NI) Order 1992. The focus of this consultation is to ensure that the modifications proposed by the UR reflect the CMA’s FD but it is not a consultation on the merits or otherwise of the FD.

Audience

This document is likely to be of interest to SONI, NIE Networks, electricity customers, other regulated companies in the energy industry, government and other statutory bodies and consumer groups with an interest in the energy industry.

Consumer impact

The consumer impact of these proposed Licence modifications is to give effect to the remedies outlined by the CMA in its 10 November 2017 Final Determination on the SONI TSO Price Control 2015-2010. The combined benefit to SONI of these remedies is approximately £5.4 million over the period 2015 – 2010. Of this total, around £1 million will be deferred into future periods. The total increase in tariffs would be approximately £1.1 million per annum which is estimate to increase domestic bills by 50 pence per annum.
Executive Summary
On 14 March 2017 the Utility Regulator (UR) published under and in accordance with Article 14(8) of the Electricity (NI) Order 1992 (the Electricity Order) its decision\(^1\) to modify the conditions of the electricity transmission licence (referred to as the TSO Licence) held by SONI Ltd (SONI), setting SONI’s allowed revenue specific to the transmission system operation business for the five-year period from October 2015 to September 2020 (the Price Control Decision).

On 12 April 2017,\(^2\) SONI applied to the Competition and Markets Authority (CMA) for permission to appeal certain aspects of the Price Control Decision. The CMA granted permission on 11 May 2017 and in accordance with the statutory framework the appeal was to be determined by the CMA by 10 November 2017. On 10 November 2017 the CMA made its Final Determination\(^3\) and Order\(^4\) on the appeal. Having allowed the appeal in part, the CMA has determined the remedies to address the errors found but remitted the matter back to the UR for reconsideration and determination in accordance with the directions set out in the Annexes to the Order.

The directions require the UR to modify the conditions of the TSO licence. Before making any licence modification the UR is required, under and in accordance with Article 14(2) of the Electricity Order, to consult on its proposals. This consultation is therefore issued under and in accordance with Article 14(2) of the Electricity Order and sets out the licence modifications the UR proposes to make to the TSO Licence in order to comply with the directions annexed to the CMA’s Order. The reasons for and effect of the proposed modifications are as set out in the CMA’s Final Determination.

We welcome comments from stakeholders on the proposed modifications to the TSO Licence for this purpose.

1. Background

1. SONI Ltd (SONI) is licensed as the Transmission System Operator (TSO) for Northern Ireland and is subject to a regulated price control. The SONI price control takes place in the context of increased renewable electricity generation, an evolving legislative subsidy environment and wider changing European legislative developments.

2. The UR’s Final Determination\(^5\) on the SONI price control for the five year period from 1 October 2015 to 30 September 2020 was published on 24 February 2016 and the Article 14(8) decision to make the associated licence modifications\(^6\) was published on 14 March 2017 (‘The Price Control Decision’).

3. On 12 April 2017, SONI made an application to the Competition and Markets Authority (CMA), under Article 14B (3) of the Electricity Order, for permission to bring an appeal against the Price Control Decision, under Article 14B (1) of the Electricity Order. It also applied for the Price Control Decision not to have effect pending the determination of the appeal.

4. Following representations to the CMA from both SONI and the UR the CMA granted SONI permission to appeal the Price Control Decision on 11 May 2017 but did not direct that the Price Control Decision was not to have effect. The licence modifications set out in the Price Control Decision came into effect on 9 May 2017.

5. The CMA considered the Notice of Appeal (the NoA) and related documents from SONI, the UR’s representations and observations on the NoA (the Defence) and related documents and submissions from the Consumer Council (Northern Ireland) (CCNI) in its capacity as an Interested Third Party (ITP).

6. Formal hearings were held by the CMA in August 2017 which afforded the UR and SONI the opportunity to answer clarifications from the CMA. The CMA issued a provisional determination to the parties on 14 September 2017 and following this submissions from parties were permitted. Formal Remedies hearings were held in October 2017.

7. The CMA published its Final Determination\(^7\) and Order\(^8\) on 10 November 2017 and the Licence Modifications appended to this paper are the proposed modifications required to give effect to the CMA’s directions in respect of its Final Determination on the appeal (where Licence Modifications are appropriate).

8. The CMA’s Final Determination and Order identified remedies for those aspects of SONI’s appeal that were allowed by the CMA; this consultation sets out the licence modifications to implement the CMA’s remedies and we seek views on the proposed licence modifications.

9. This document does not consult on the Requirements Guidance documentation associated with the Transmission Network Pre-construction Projects and the documentation associated with the Excluded SSS/TUOS costs. This is the subject of a separate statutory consultation, published alongside this consultation.

10. Also, this document also does not consult on changes that may be required to the Transmission Interface Agreement (TIA) for the transfer of Transmission Network Pre-construction Projects (TNPP’s) from SONI to NIE Networks, as part of CMA’s required codification. This will be the subject of a future consultation document, which will consider some other issues with the TIA.

11. The CMA Order comments on Pre-Construction Network Projects (PCNP’s), however the PCNP term is not used within the licence but will be referred to as Transmission Network Pre-construction Projects (TNPP’s) going forward in line with the proposed licence drafting.

12. For the first few years of SONI’s current price control period, prior to the licence modifications taking effect, tariffs were set based upon previous tariff approvals for 2014/15. In approving these tariffs we advised that the approval was without prejudice to the eventual revenue allowance, which will be adjusted to reflect the appropriate allowance once the price control is established. In keeping with this, UR ‘trued-up’9 the first years of the price control, such that it essentially had effect from the intended start date of 1 October 2015, except for the allowances for pre-construction activities.

13. Following the CMA determination, which has determined an allowance for the respective period, it is the UR’s intention ensure that the tariffs for the remaining years within the price control period take account of the difference between the CMA allowed amounts (as per the proposed licence conditions) and the recovered amounts for the first few years of the price control.

14. Any differences between the allowed revenues and actual revenues can be dealt with through the use of the Kt term so as to have the same effect/impact as if the licence modifications were in force from 1 October 2015. This will ensure that consumers are protected and only approved allowances should be collected through tariffs.

6.2 Where the Authority makes a determination pursuant to paragraph 6.1, it may, for the purposes of ensuring that the financial position and performance of the Licensee is likely, so far as reasonably practicable, to be the same as if the Relevant Change of Law had not taken place, give effect to that determination by also determining, and notifying the Licensee of, an amount (whether a positive or negative figure) that is an allowed amount for change of law, for the purposes of calculating $D_{TSO}$ in accordance with paragraph 2.2(d) of this Annex, for each Relevant Year $t$ specified in the Authority's notification.

7.3 In each Relevant Year t on the decision of the Authority regarding unit coverage of the System Support Services charge, the Licensee will then draw up for the Relevant Year t the schedule of System Support Services charges in accordance with Condition 30 in a manner which is consistent with the decision of the Authority regarding unit coverage. If the Licensee draws up for Relevant Year t the schedule of System Support Services charges in accordance with Condition 30 in a manner which is not consistent with the decision of the Authority regarding unit coverage then the Authority’s approval under Condition 30 paragraph 6 for the form of this schedule will not be granted.
